NON-VENTILATED ENCLOSURES

Protecting your
laboratory environment

LABCONCO

PURIFIER® CLASS I & HEPA FILTERED SAFETY ENCLOSURES

INTRODUCTION

Purifier Class I Safety Enclosures and Purifier HEPA Filtered Enclosures protect you and your laboratory environment. They are an economical alternative to Class II biosafety cabinets when your applications do not require product protection.

Purifier Class I Enclosures protect the user from agents that require Biosafety Level 1, 2 or 3 containment but no product protection. These enclosures include an ultraviolet light that may be used in conjunction with surface disinfection to ensure thorough decontamination. The UV light has an interlocking protection panel to ensure that the light operates only when the enclosure is not in use, to avoid personnel exposure to UV rays.

Purifier HEPA Filtered Enclosures, which do not include a UV light, protect the user from hazardous chemical powders, dust and allergens in diverse applications ranging from screening suspicious mail to blending dry chemicals.

For applications involving odor-generating materials, Purifier Class I and HEPA Filtered Enclosures may be outfitted with an accessory Trace Odor Carbon Filter to trap nuisance organic, formaldehyde or ammonia vapors. When connected to the accessory Canopy Connection and ducted outside to a remote blower or house exhaust, Purifier Class I and HEPA Filtered Enclosures may be used with fume-generating materials or agents that have been treated with toxic chemicals or radionuclides as an adjunct to research. These canopy-ducted enclosures have the added benefit of eliminating nuisance odors. Use of acids, which would corrode the internal blower within these enclosures, is prohibited. Contact Labconco for information on enclosures suitable for use with acids.

Purifier Class I Enclosure 3980303 on Solid Epoxy Dished Work Surface 3909901 and Telescoping Base Stand 3746711 with Ergonomic Chair 3744000.

During operation, room air is drawn into the front of the enclosure, preventing aerosols from escaping into the room. Before leaving the enclosure and returning to the environment, 100% of the air passes through an exhaust HEPA filter.

PURIFIER® CLASS I & HEPA FILTERED SAFETY ENCLOSURES

FEATURES & BENEFITS

Sturdy powder-coated aluminum frame and steel rear plenum and baffle dissipate static charge and provide durability and corrosion resistance.

Front-mounted differential pressure gauge monitors pressure differential across the HEPA filter to help determine filter loading.

Tempered safety glass front sash and sides offer excellent visibility and protection. Glass has better fire, scratch and corrosion resistance than acrylic and dissipates static charge.

■ **Patented* rear baffle with zones of perforations** promotes horizontal laminar airflow to maximize containment.

■ **Upper containment sash foil**, a small gap above the sash handle, bleeds air into the enclosure to direct contaminants away from the operator's breathing zone.

Two utility ports with iris openings allow passage of tubing and cords from inside to back exterior for connection to services.

■ **Patented* Clean-Sweep™ air foil** allows air to sweep the work surface for maximum containment. Airflow openings pull inflow air from under the air foil so that clean air continually flows over the air foil creating a constant barrier of protection from contaminants.

■ **Side-entry air foils** allow air to sweep across the interior glass surfaces to enhance containment.

Space-saving design. Impeller and HEPA filter are contained within the enclosure's upper plenum for a small overall footprint.

Built-in exhaust HEPA filter, 99.99% efficient on 0.3 micron particles.

Support hooks (Class I models only) allow the UV protection panel to be stowed above the work area while the enclosure is in use.

Intrinsically-safe design. The positive pressure impeller is surrounded by a negative pressure plenum so that if a leak should develop, the unfiltered air is captured and refiltered.

Optional built-in Guardian™ Airflow Monitor alerts the user to face velocities outside of preset range, indicating HEPA filter loading or blower malfunction.

Glare-free fluorescent lighting.

Low discharge volume reduces cross currents and provides quiet operation from 49 to 67 decibels depending on face velocity.

■ **Upper dilution air supply** introduces room air at the top of the sash to dilute concentrations in the upper chamber and bathes the back of the sash with clean air.

Front-mounted light and blower switches.

Speed control regulates speed of the built-in blower and may be used by a certifier to adjust and validate inflow velocity.

Ergonomic 10° angled sash allows a closer view, reduces glare and provides a more comfortable operating position than vertical sashes. The hinged sash pivots up and locks to a loading height of 20". Side seals help to keep contaminants contained.

254 nm UV light with interlocking UV protection panel (Class I models only) for secondary decontamination while the enclosure is not in use. The UV light does not illuminate without the panel in place.

Accessory Solid Epoxy Dished Work Surface. See page 6.

ETL-listed. Enclosures carry the ETL mark signifying that they are certified to UL 3101-1/61010-1 and CAN/CSA C22.2 No. 1010.1.

CE mark. All 230 volt, 50 Hz models conform to the CE (European Community) requirements for electrical safety and electromagnetic compatibility.

■ **Variable digital timer** provides timed UV light exposure (Class I models only). From the front-mounted control panel, the operator may select from eight settings in minutes of 5, 10, 15, 30, 60, 120, 240 and continuous. When the UV light switch is activated, the previously selected time is automatically initiated or the user may select a different setting. An amber LED indicator blinks for the duration of the setting.

Particulate containment tested. Free validation package containing independent containment testing verification is available.

ASHRAE 110-1995 conformity.

Biological containment verified per NSF Standard Number 49 Personnel Protection Test.

* U.S. Patent No. 6,461,233

■ Exclusive feature

Optional Trace Odor Carbon Filters designed for organic, formaldehyde and ammonia odor applications are easily installed and replaced from the top of the enclosure.

PURIFIER® CLASS I SAFETY ENCLOSURES

ORDERING INFORMATION

Standard Features

- Nominal inflow velocity of 75 to 105 fpm
- Ergonomic air foil with aerodynamic Clean-Sweep* airflow openings
- Upper dilution air supply
- Zone-perforated rear baffle*
- Side-entry air foils
- Exhaust HEPA filter, 99.99% efficient on 0.3 micron particles
- Variable speed built-in blower with dynamically-balanced, vibration-isolated motorized impeller and solid state control rated for 5 amps
- Intrinsically-safe, negative pressure design
- Differential pressure gauge
- Low discharge volume and quiet operation (*see chart below*).

Nominal Width	Total Exhaust CFM	Noise Pressure				
	105 fpm	db(A)	90 fpm	db(A)	75 fpm	db(A)
2 Feet	155	54-59	130	51-57	110	49-55
3 Feet	230	60-64	200	55-58	165	52-56
4 Feet	310	64-67	265	60-63	220	54-58

- Upper containment sash foil
- Glacier white and gray powder-coated aluminum frame and steel rear plenum and baffle
- Fluorescent lamp
- 254 nm UV lamp with interlocking UV protection panel and two support hooks located atop the bench for stowing the panel.
- Variable digital timer for UV exposure with eight settings in minutes of 5, 10, 15, 30, 60, 120, 240 and continuous
- Blower switch and 3-way light switch: UV, off and fluorescent
- 1/4" thick tempered safety glass front sash and sides
- 9.44" high sash opening
- Ergonomic 10° angled and hinged sash that pivots upward, locks to a loading height of 20" and has side wiping seals
- Two utility ports with iris openings
- Particulate containment tested
- Biological containment verified per NSF Standard Number 49 Personnel Protection Test
- ASHRAE 110-1995 conformity tested
- ETL listing, UL 3101-1/61010-1 and CAN/CSA C22.2 No. 1010.1 conformity (115 volt models)
- CE Conformity Marking (230 volt models)
- One year warranty on parts and labor
- Validation package available

Purifier Class I Safety Enclosure 3980203 on Solid Epoxy Dished Work Surface 3909900 and Telescoping Base Stand 3746710.

Standard Option

- Guardian Airflow Monitor that continuously monitors airflow and has two LED lights to indicate when airflow is within or outside set point range. The green LED glows when airflow is within set point range. The red LED glows and an audible alarm sounds when airflow is outside set point range.

Required Accessories

- Supporting work surface. Place on existing casework or see page 6.
- Supporting base. Place on existing casework or see pages 28-31.

See page 6 for dimensional drawings.

PURIFIER® CLASS I & HEPA FILTERED SAFETY ENCLOSURES

DIMENSIONS & ACCESSORIES

	2-Foot	3-Foot	4-Foot
A	24.0" (61.0 cm)	36.0" (91.4 cm)	48.0" (121.9 cm)
B	21.6" (54.9 cm)	33.6" (85.3 cm)	45.6" (115.8 cm)

Trace Odor Carbon Filters

For easy installation atop the Purifier Class I or HEPA Filtered Enclosure. Filters trap non-volatile nuisance odors and vapors from samples or minute quantities of chemicals.

Whether or not a Trace Odor Carbon Filter is appropriate for your application requires consideration of factors such as the time-weighted exposure limits of organic solvents, formaldehyde, ammonia or amines. Using Labconco's exclusive Chemical Assessment Program, our technical specialists can help you determine if the Purifier Enclosure with Trace Odor Carbon Filter is right for your applications and, if so, estimate filter life. To begin the process, please complete the Chemical Usage Assessment Form available at: labconco.com or call us at 800-821-5525 or 816-333-8811.

Catalog #	Description	For use with:	Shipping Weight
3937200	Organic, 5.5 lbs. activated carbon	2-Ft Purifier Enclosure	6.0 lbs. (2.7 kg)
3937300	Organic, 9.2 lbs. activated carbon	3-Ft Purifier Enclosure	10.0 lbs. (4.5 kg)
3937400	Organic, 12.9 lbs. activated carbon	4-Ft Purifier Enclosure	13.0 lbs. (5.9 kg)
3937201	Formaldehyde, 7 lbs. impregnated carbon	2-Ft Purifier Enclosure	7.5 lbs. (3.4 kg)
3937301	Formaldehyde, 12 lbs. impregnated carbon	3-Ft Purifier Enclosure	12.5 lbs. (5.7 kg)
3937401	Formaldehyde, 16.8 lbs. impregnated carbon	4-Ft Purifier Enclosure	17.0 lbs. (7.7 kg)
3937202	Ammonia & Amines, 8 lbs. impregnated carbon	2-Ft Purifier Enclosure	8.5 lbs. (3.9 kg)
3937302	Ammonia & Amines, 13.5 lbs. impregnated carbon	3-Ft Purifier Enclosure	14.0 lbs. (6.4 kg)
3937402	Ammonia & Amines, 18.9 lbs. impregnated carbon	4-Ft Purifier Enclosure	19.0 lbs. (8.6 kg)

Solid Epoxy Dished Work Surfaces

Black chemical-resistant work surface is contoured to fit the dimensions of the Purifier Class I and HEPA Filtered Enclosure and to contain spills.

Catalog #	For use with	Dimensions	Shipping Weight
3909900	2-Ft Purifier Enclosure	24.0" w x 29.0" d x 1.0" h (61 cm x 73.7 cm x 2.5 cm)	50 lbs. (23 kg)
3909901	3-Ft Purifier Enclosure	36.0" w x 29.0" d x 1.0" h (91.4 cm x 73.7 cm x 2.5 cm)	75 lbs. (34 kg)
3909902	4-Ft Purifier Enclosure	48.0" w x 29.0" d x 1.0" h (122 cm x 73.7 cm x 2.5 cm)	100 lbs. (45 kg)

Base Stands

Powder-coated steel. Telescoping Base Stands adjust in 1" increments to provide a working height from 30" to 36" and are available with fixed feet or casters. Electric and Manual Hydraulic Lift Base Stands have infinite

height adjustment using a push button or hand crank. See pages 28-31 for more information.

3925000 Utility Shelves

Three powder-coated steel shelves attach to the rear baffle perforations to hold a printer, utensils and other miscellaneous supplies. The utensil shelf has a scalloped front edge for spatulas, brushes and other items. Shipping weight 5.0 lbs. (2.2 kg)

3927700 Bottle Holder

Powder-coated steel. Attaches to the rear baffle perforations to hold a squirt bottle or other round container. 3" diameter opening. Shipping weight 1.0 lb. (0.5 kg)

3927800 Tissue Holder

Powder-coated steel. Attaches to the rear baffle perforations to hold a 4.63" x 4.75" box of tissue wipers in the upside down position. An opening in the bottom of the holder permits tissues to be dispensed from the bottom. Shipping weight 1 lb. (0.5 kg)

3744000 Ergonomic Chair with Armrests

Chair has 6-way articulating seat and back control. Pneumatic mechanism adjusts seat height from 18.25" to 25.75". Shipping weight 43.0 lbs. (19.5 kg). See page 27 for more information. **⚠WARNING:** Cancer - P65Warnings.ca.gov (California only)

3746000 Adjustable Footrest

Elevates feet and permits angle repositioning while in use. 18.5" w x 11.5" d x 8" high. Shipping weight 6.0 lbs. (2.7 kg)

PURIFIER® CLASS I & HEPA FILTERED SAFETY ENCLOSURES

ACCESSORIES & DUCTWORK

Remote Blowers

Coated steel blowers with belt-drive motors. See page 27 for more information.

Canopy Connections

Connection allows the Enclosure to be canopy-ducted to the outside for additional protection. The canopy's air gap balances the air by allowing room air to enter the ductwork and mix with the filtered air being exhausted from the Enclosure. Outlet accepts 6" nominal diameter ductwork. **Ductwork and house exhaust or Remote Blower are required (not included).**

Catalog #	Description	For use with:	Exhaust Volume	Shipping Weight
3924400	2-Ft Canopy Connection	2-Ft Purifier Class I & HEPA Filtered Enclosures	110 to 155 CFM	15 lbs. (6.8 kg)
3924401	3-Ft Canopy Connection	3-Ft Purifier Class I & HEPA Filtered Enclosures	165 to 230 CFM	18 lbs. (8.2 kg)
3924402	4-Ft Canopy Connection	4-Ft Purifier Class I & HEPA Filtered Enclosures	220 to 310 CFM	21 lbs. (9.5 kg)

Thermoplastic Duct

PVC exhaust duct in 10' lengths. A Female Duct Coupling and solvent cement are required to join two sections.

Catalog #	Nominal Dia.	Actual OD	Actual ID	Shipping Wt.
4708600	6"	6.625"	6.25"	25 lbs. (11.3 kg)
4718900	8"	8.625"	8.25"	35 lbs. (15.9 kg)

Female Duct Coupling

PVC coupling joins two sections of Thermoplastic Duct.

Catalog #	Nominal Dia.	Equivalent Resistance*	Shipping Wt.
4708900	6"	0	4 lbs. (1.8 kg)

Male Duct Coupling

PVC coupling joins two Duct Reducers and Duct Reducer to Blower.

Catalog #	Nominal Dia.	Equivalent Resistance*	Shipping Wt.
4719900	8"	0	4 lbs. (1.8 kg)
7027800	10"	0	5 lbs. (2.3 kg)

90° Elbow

PVC Elbow has belled end connections to receive Thermoplastic Duct or Male Duct Coupling directly.

Catalog #	Nominal Dia.	Equivalent Resistance*	Shipping Wt.
4708700	6"	12 ft.	8 lbs. (3.6 kg)

*Equivalent resistance is measured in feet of straight duct.

Flexible Duct Connection

Reduces vibration between the blower and PVC ductwork. Supplied with two clamps. **WARNING:** Cancer - P65Warnings.ca.gov

Catalog #	Nominal Dia.	Shipping Wt.
4861800	7" for use with 6" fittings	8 lbs. (3.6 kg)

Exhaust Dampers

Catalog #	Nominal Diameter	Material	Equivalent Resistance*	Shipping Weight
4724200	6"	PVC	1 ft.	1 lb. (0.5 kg)
3924000	6"	Powder-coated steel	1 ft.	1 lb. (0.5 kg)

Duct Reducers

PVC reducers connect duct and male couplings of different diameters.

Catalog #	Nominal Dia.	Equivalent Resistance*	Shipping Wt.
5605900	6" x 8"	0	2 lbs. (0.9 kg)
5606000	8" x 10"	0	5 lbs. (2.3 kg)

Coated-Coated Steel Blower Transition Adapter

Catalog #	Nominal Dia.	Equivalent Resistance*	Shipping Wt.
4722400	8"	1 ft.	3 lbs. (1.4 kg)

Zero Pressure Weathercap

PVC Weathercap fits atop standard PVC duct, permits vertical discharge of effluent air above roof line for dispersion away from building.

Catalog #	Nominal Diameter	Equivalent Resistance*	Height	Shipping Weight
4722300	8"	5 ft.	40"	25 lbs. (11.3 kg)

Typical Class I and HEPA Filtered Enclosure Exhaust System

Contact Labconco for technical assistance in selecting the right ductwork for your installation.

PURIFIER® HORIZONTAL CLEAN BENCHES

INTRODUCTION

The Purifier Horizontal Clean Bench protects your work. It is the ISO Class 5 work station of choice to protect materials that do not generate harmful aerosols or vapors, yet require a particulate-free environment. Suitable applications for the bench include plant tissue culture research, media preparation, electronic part inspection, syringe filling, medical device assembly and nonhazardous parenteral drug formulation.

Because air from the work area is dispersed directly into the laboratory, Purifier Horizontal Clean Benches should never be used in conjunction with biohazardous material, toxins or radionuclides. You and your safety officer must carefully assess the risk associated with any operation performed in a clean bench. Purifier Horizontal Clean Benches are offered in 3', 4', 5', 6' and 8' widths.

Purifier Horizontal Clean Bench 3818500 on Telescoping Base Stand 3857300, with Ergonomic Chair 3744000.

During operation, room air is drawn through a prefilter in the top of the bench to trap large particles. Then, the air flows through a 99.99% efficient HEPA filter and is projected horizontally across the entire work area. This HEPA-filtered air minimizes cross contamination in the work area and provides a particulate-free work environment.

Unique to the Purifier Horizontal Clean Bench is its double HEPA filter seal. The primary gasket seals the upstream side of the filter to prevent unfiltered air from leaking into the work area. The secondary gasket at the front of the HEPA filter seals the downstream side of the filter frame. The area between these two gaskets is maintained under negative pressure. Should a leak occur at the primary HEPA filter gasket, the contaminated air is immediately recaptured and refiltered.

PURIFIER® HORIZONTAL CLEAN BENCHES

FEATURES & BENEFITS

Replaceable prefilters trap large particles, extend HEPA filter life.

Particle-free ISO Class 5 air. Particle counts in the work area conform to ISO 14644-1 and 2, providing ISO Class 5 conditions (formerly Class 100). This ensures fewer than 3520 particles 0.5 µm or larger per cubic meter of air.

Glare-free fluorescent lighting.

Optional factory-installed 254 nm UV light with screen for secondary decontamination while the bench is not in use. UV light switch is safety interlocked with the UV screen to help prevent inadvertent UV exposure while the bench is in operation. The screen acts as a barrier when the UV light is on and the bench is not in use.

Variable digital timer on models with optional UV light provides timed UV light exposure. From the front-mounted control panel, the operator may select from eight settings in minutes of 5, 10, 15, 30, 60, 120, 240 and continuous. When the UV light switch is activated, the previously selected time setting is automatically initiated or the user may select a different setting. An amber LED indicator blinks for the duration of the setting.

99.99% efficient HEPA filter is industry standard size for economical replacement.

Low vibration, variable speed motor/blower(s).

Differential pressure gauge displays pressure across the HEPA filter.

Angled profile design. Front panel has no protrusions that could hinder visibility for taller users.

Front-mounted light and blower switches.

Double-gasket, negative pressure leak protection.

CE Mark. All 230 volt models conform to the following CE (European Community requirements for electrical safety and electromagnetic compatibility).

ETL listed. All 115 volt, 60 Hz models carry the ETL mark signifying that they conform to UL/CSA C22.2 No. 61010-1.

Two convenient utility ports with iris openings allow passage of tubing and electrical cords from equipment inside the enclosure through the back for connection to services. Plugs are provided to seal the ports when not in use.

Type 304 brushed stainless steel work surface with comfortable rounded front edge.

Accessory Telescoping Base Stand. See pages 28-29 for ordering information.

 Exclusive feature

PURIFIER® HORIZONTAL CLEAN BENCHES

ORDERING INFORMATION & DIMENSIONS

Purifier Horizontal Clean Bench 3818500 on Telescoping Base Stand 3857300

Standard Features

- Horizontal laminar flow
- 99.99% efficient HEPA filter (2 each on 8' models)
- Prefilters (2 each on 3' and 4' models; 3 each on 5' and 6' models; 4 each on 8' models)
- Class 5 conditions per ISO 14644-1 and 2 (formerly Class 100)
- Differential pressure gauge
- Double-gasket, negative pressure HEPA filter leak protection
- Front-mounted light and blower switches
- Variable speed motor/blower(s) with vibration isolation pad (2 each on 5', 6' and 8' models)
- Fluorescent lighting
- Type 304 brushed stainless steel work surface
- Glacier white powder-coated steel exterior
- 1/4" thick tempered safety glass side panels with utility ports with iris openings
- May be disassembled for passage through a narrow door or hallway (16.4" deep passageway minimum)
- Angled front profile
- 10' (3 m) power cord with plug
- ETL listing, UL/CSA C22.2 No. 61010-1 conformity (115 volt models)
- CE Conformity Marking (230 volt models)
- One year warranty on parts and labor

■ Exclusive feature

Standard Option Package

- Factory-installed, 254 nm UV lamp with UV screen and interlocking safety switch allowing operation only when blower and fluorescent light are off, and UV screen is closed

Required Accessory

- Supporting base. Place on existing casework or see pages 28-29.

3-FT & 4-FT PURIFIER® HORIZONTAL CLEAN BENCHES

PURIFIER® HORIZONTAL CLEAN BENCHES

ACCESSORIES

Telescoping Base Stands

Powder-coated steel frame. Adjust in 1" increments to provide a working height from 28.75 to 34.75". Available with fixed feet or casters. See pages 28-29 for more information.

IV Bar Kits

Support intravenous solution bottles and bags. Each includes IV bar, mounting hardware, four hangers and instructions for installation. Three-foot, four-foot and five-foot Purifier Clean Benches accommodate one IV bar. Six-foot and eight-foot benches accommodate two. Shipping weight 5.0 lbs. (2.3 kg)

Catalog #	For use with:	# Required
3697500	3-Ft Purifier Clean Benches	1
3697500	4-Ft Purifier Clean Benches	1
3697501	5-Ft Purifier Clean Benches	1
3697500	6-Ft Purifier Clean Benches	2
3697500	8-Ft Purifier Clean Benches	2

3746000 Adjustable Footrest

Elevates feet and permits angle repositioning while in use. 18.5" w x 11.5" d x 8" high. Shipping weight 6.0 lbs. (2.7 kg)

Replacement Prefilters

Labconco recommends replacing prefilters every three months. One each. Shipping weight 1.0 lb. (0.4 kg)

Catalog #	For use with:	# Required
3768900	3-Ft Purifier Clean Benches	2
3768901	4-Ft Purifier Clean Benches	2
3768900	5-Ft Purifier Clean Benches	2
3768901	5-Ft Purifier Clean Benches	1
3768901	6-Ft Purifier Clean Benches	3
3768901	8-Ft Purifier Clean Benches	4

3744000 Ergonomic Chair with Armrests

Lab chair has 6-way articulating seat and back control. Pneumatic mechanism adjusts seat height from 18.25" to 25.75". Shipping weight 43.0 lbs. (19.5 kg). See page 27 for more information.

PURIFIER® VERTICAL CLEAN BENCHES

INTRODUCTION

Purifier Vertical Clean Benches protect your work from particulate contamination. Using a 99.99% efficient supply HEPA filter, Purifier Vertical Clean Benches maintain ISO Class 5 conditions (formerly Class 100) in the work area. Appropriate applications for Clean Benches include plant tissue culture, media plate preparation, electronics inspection, medical device assembly and IV solution preparation.

Because Purifier Vertical Clean Benches do not provide protection to the user, they should not be used in conjunction with biohazardous material, toxins or radionuclides. You and your safety officer must carefully assess the risk associated with any operation performed in a clean bench.

Purifier Vertical Clean Benches are offered in 2', 3' and 4' widths. Built-in options include a UV light with timer for secondary decontamination and a Guardian Airflow Monitor to monitor downflow velocity and HEPA filter loading.

Purifier Vertical Clean Bench 3970200 on Solid Epoxy Dished Work Surface 3909900 and Telescoping Base Stand 3746710 with Ergonomic Chair 3744000 and Adjustable Footrest 3746000.

During operation, room air is drawn through a prefilter in the top of the cabinet to trap large particles. Then, the air flows through a 99.99% efficient HEPA filter and is projected vertically over the work area. This HEPA-filtered air prevents contaminants from entering the work area and provides a particulate-free work environment that minimizes cross contamination.

PURIFIER® VERTICAL CLEAN BENCHES

FEATURES & BENEFITS

HEPA filter is rated to remove 99.99% of all particles 0.3 micron in size. It is industry standard size for economical replacement.

Disposable prefilter traps large particles to extend the life of the HEPA filter.

Front-mounted differential pressure gauge indicates the total system pressure across the HEPA filter and pressurized plenum to help determine HEPA filter loading.

Variable digital timer provides timed UV light exposure on models with UV lamp. From the front-mounted control panel, the operator may select from eight settings in minutes of 5, 10, 15, 30, 60, 120, 240 and continuous. When the UV light switch is activated, the previously selected time setting is automatically initiated or the user may select a different setting. An amber LED indicator blinks for the duration of the setting.

Air diffuser protects the HEPA filter from possible damage from direct contact with the operator and apparatus inside the enclosure. It distributes air evenly across the work area to optimize airflow.

Support hooks (on models with UV lamp) allow the UV protection panel to be stowed above the work area while the enclosure is in use.

Light and blower switches are located within easy reach of the operator. On models with UV light, a single 3-way switch powers the fluorescent and UV light, but only one at a time, helping to protect the operator from inadvertent UV exposure.

Tempered safety glass sash is sloped 10° for less glare and closer, more comfortable viewing than vertical sashes offer. The glass is UV opaque and resistant to UV irradiation. Wiping seals ensure ISO Class 5 conditions inside the enclosure. The sash has a spring-loaded latch so that it may be pivoted upward and locked open for loading and cleaning.

Glare-free fluorescent lighting. The lamp is located above the work area, out of contact with the filtered air.

CE mark. All 230 volt, 50 Hz models conform to the CE (European Community) requirements for electrical safety and electromagnetic compatibility.

ETL listed. All 115 volt, 60 Hz models carry the ETL mark signifying that they are certified to UL Standard 3101-1/61010-1 and CAN/CSA C22.2 No. 1010.1.

Optional built-in Guardian™ Airflow Monitor alerts the user to downflow velocities outside of preset range and HEPA filter conditions.

Two convenient utility ports with iris openings allow passage of tubing and electrical cords from equipment inside the enclosure through the back for connection to services. Plugs are provided to seal the ports when not in use.

Variable speed blower with solid state control may be accessed by a certified technician to validate and adjust downflow velocity.

Ultraviolet lamp, 254 nm, with interlocked protection panel (on models with UV lamp) provides secondary decontamination while the bench is not in use. The UV light does not penetrate the plane of the sash and air foil.

Particulate-free ISO Class 5 air. Particle counts in the work area conform to ISO 14644-1 and 2, providing ISO Class 5 conditions (formerly Class 100 per Federal Standard 209E), ensuring fewer than 3520 particles 0.5 µm or larger per cubic meter of air.

Accessory Solid Epoxy Dished Work Surface. See page 23 for ordering information.

 Exclusive feature

PURIFIER® VERTICAL CLEAN BENCHES

ORDERING INFORMATION

Standard Features

- Vertical laminar flow
- Nominal downflow velocity of 40-55 fpm
- Supply HEPA filter, 99.99% efficient on particles 0.3 micron
- ISO Class 5 air (formerly Class 100 per Federal Standard 209E)
- Disposable prefilter
- Variable speed built-in blower with motorized impeller and solid state control rated for 5 amps
- Differential pressure gauge
- Air diffuser
- UV-resistant, glacier white and gray powder-coated aluminum and steel construction
- UV-opaque and resistant 1/4" thick tempered safety glass sash and sides
- Fluorescent lamp
- Light and blower switches
- 9.4" high sash opening
 - Ergonomic 10° angled and hinged sash that pivots upward, locks to a loading height of 20" and has wiping seals to promote ISO Class 5 conditions
- Two utility ports with iris openings and plugs
- ETL listing, UL 3101-1/61010-1 and CAN/CSA C22.2 No. 1010.1 conformity (115 volt models)
- CE Conformity Marking (230 volt models)
- One year warranty on parts and labor

Standard Options

- Guardian Airflow Monitor that continuously monitors downflow airflow and has two LED lights to indicate when airflow is within or outside set point range. Set point is factory calibrated for 25-35 fpm downflow velocity. The "Safe" green LED glows when airflow is within set point range. The "Alert" red LED glows and an audible alarm sounds when airflow is outside set point range. The audible alarm may be muted by pressing the "Silence Alarm" switch.
- 254 nm UV lamp with 3-way switch (fluorescent, UV and off), interlocked protection panel that closes the sash opening to guard inadvertent exposure to UV rays; variable digital timer with eight settings in minutes of 5, 10, 15, 30, 60, 120, 240 and continuous; and two support hooks located atop the bench for stowing the panel.

Required Accessories

- Supporting work surface. Place on existing casework or see page 23.
- Supporting base. Place on existing casework or see pages 28-31.

See page 23 for dimensional drawings.

- Exclusive feature

Purifier Vertical Clean Bench 3970200 on Solid Epoxy Dished Work Surface 3909900 and Telescoping Base Stand 3746710.

PURIFIER® FILTERED PCR ENCLOSURES

INTRODUCTION

Purifier Filtered PCR Enclosures are vertical clean benches that protect your work. Available in 2', 3' and 4' widths, they provide a controlled environment in which to perform polymerase chain reaction experiments. ISO Class 5 air is constantly projected vertically down over the work area, minimizing the risk of cross contamination of samples.

Purifier Filtered PCR Enclosures do not provide protection to the user and should not be used in conjunction with biohazardous material, toxins or radionuclides. You and your safety officer must carefully assess risks associated with any operation performed in the PCR enclosure.

The variable digital timer provides UV light exposure continuously or in user-selected increments of 5, 10, 15, 30, 60, 120 or 240 minutes to deactivate DNA and RNA contaminants. When the timer expires, the UV light automatically switches off in preparation for the next experiment. An interlocked protection panel guards against inadvertent exposure to UV rays.

Purifier Filtered PCR Enclosure 3970305 on Solid Epoxy Dished Work Surface 3909901 and Telescoping Base Stand 3746711 with Ergonomic Chair 3744000 and Adjustable Footrest 3746000.

During operation, room air is drawn through a prefilter in the top of the cabinet to trap large particles. Then, the air flows through a 99.99% efficient HEPA filter and is projected vertically over the work area. This HEPA-filtered air prevents contaminants from entering the work area and provides a particulate-free work environment that minimizes cross contamination.

PURIFIER® FILTERED PCR ENCLOSURES

FEATURES & BENEFITS

Particulate-free ISO Class 5 air. Particle counts in the work area conform to ISO 14644-1 and 2, providing ISO Class 5 conditions (formerly Class 100 per Federal Standard 209E), ensuring fewer than 3520 particles 0.5 µm or larger per cubic meter of air.

Front-mounted differential pressure gauge indicates the total system pressure across the HEPA filter and pressurized plenum to help determine HEPA filter loading.

ETL listed. All 115 volt, 60 Hz models carry the ETL mark signifying that they are certified to UL Standard 3101-1/61010-1 and CAN/CSA C22.2 No. 1010.1.

CE mark. All 230 volt, 50 Hz models conform to the CE (European Community) requirements for electrical safety and electromagnetic compatibility.

Two convenient utility ports with iris openings allow passage of tubing and electrical cords from equipment inside the enclosure through the back for connection to services. Plugs are provided to seal the ports when not in use.

Ultraviolet lamp, 254 nm, with interlocked protection denatures stray DNA strands and provides secondary decontamination while the enclosure is not in use. Two top-mounted support hooks allow the protection panel to be stowed above the work area while the bench is in use.

HEPA filter is rated to remove 99.99% of all particles 0.3 micron in size. It is industry standard size for economical replacement.

Disposable prefilter traps large particles to extend the life of the HEPA filter.

Support hooks allow the UV protection panel to be stowed above the work area while the enclosure is in use.

Air diffuser protects the HEPA filter from possible damage from direct contact with the operator and apparatus inside the enclosure. It distributes air evenly across the work area to optimize airflow.

Variable speed blower with solid state control may be accessed by a certified technician to validate and adjust downflow velocity.

Glare-free fluorescent lighting. The lamp is located above the work area, out of contact with the filtered air.

Light and blower switches are located within easy reach of the operator. The 3-way light switch powers the fluorescent and UV light, but only one at a time, helping to protect the operator from inadvertent UV exposure.

Tempered safety glass sash is sloped 10° for less glare and closer, more comfortable viewing than vertical sashes offer. The glass is UV opaque and resistant to UV irradiation. Wiping seals ensure ISO Class 5 conditions inside the enclosure. The sash has a spring-loaded latch so that it may be pivoted upward and locked open for loading and cleaning.

Protection panel interlocked with the UV lamp closes off the sash opening to guard against inadvertent UV light exposure and prevent contaminants from entering when the enclosure is not in use.

Accessory Solid Epoxy Dished Work Surface. See page 23 for ordering information.

Variable digital timer provides timed UV light exposure. From the front-mounted control panel, the operator may select from eight settings in minutes of 5, 10, 15, 30, 60, 120, 240 and continuous. When the UV light switch is activated, the previously selected time setting is automatically initiated or the user may select a different setting. An amber LED indicator blinks for the duration of the setting.

Optional built-in Guardian™ Airflow Monitor alerts the user to downflow velocities outside of preset range and HEPA filter conditions.

PURIFIER® VERTICAL CLEAN BENCHES & FILTERED PCR ENCLOSURES

DIMENSIONS & ACCESSORIES

TOP

FRONT

SIDE

Purifier Vertical Clean Benches & Filtered PCR Enclosures

	2-Foot	3-Foot	4-Foot
A	24.0" (61.0 cm)	36.0" (91.4 cm)	48.0" (121.9 cm)
B	22.8" (57.9 cm)	34.8" (88.4 cm)	46.8" (118.9 cm)

Replacement Disposable Prefilters

Corrugated paper prefilters trap large particles to extend HEPA filter life. Labconco recommends replacing the prefilter every three months. One each.

Catalog #	For use with	Shipping Weight
3935700	2-Ft Vertical Clean Bench	1.0 lb. (0.5 kg)
3935701	3-Ft Vertical Clean Bench	1.0 lb. (0.5 kg)
3935702	4-Ft Vertical Clean Bench	1.0 lb. (0.5 kg)

IV Bars

Support intravenous solution bottles and bags. Include IV bar, mounting hardware, four hangers and installation instructions.

Catalog #	For use with	Shipping Weight
3721000	2-Ft Vertical Clean Bench	4.0 lbs. (1.8 kg)
3721001	3-Ft Vertical Clean Bench	6.0 lbs. (2.7 kg)
3721002	4-Ft Vertical Clean Bench	8.0 lbs. (3.6 kg)

Base Stands

Powder-coated steel. Telescoping Base Stands adjust in 1" increments to provide a working height from 30" to 36" and are available with fixed feet or casters. Electric and Manual Hydraulic Lift Base Stands have

infinite height adjustment using a push button or hand crank. See pages 28-31 for more information.

Solid Epoxy Dished Work Surfaces

Black chemical-resistant work surface is contoured to fit the dimensions of the Purifier Vertical Clean Benches and Filtered PCR Enclosures and to contain spills.

Catalog #	For use with	Dimensions	Shipping Weight
3909900	2-Ft Purifier Enclosure	24.0" w x 29.0" d x 1.0" h (61 cm x 73.7 cm x 2.5 cm)	50.0 lbs. (23 kg)
3909901	3-Ft Purifier Enclosure	36.0" w x 29.0" d x 1.0" h (91.4 cm x 73.7 cm x 2.5 cm)	75.0 lbs. (34 kg)
3909902	4-Ft Purifier Enclosure	48.0" w x 29.0" d x 1.0" h (122 cm x 73.7 cm x 2.5 cm)	100.0 lbs. (45 kg)

3744000 Ergonomic Chair with Armrests

Chair has 6-way articulating seat and back control for personalized adjustment. Pneumatic mechanism adjusts seat height from 18.25" to 25.75". Shipping weight 43.0 lbs. (19.5 kg). See page 27 for more information. **⚠WARNING:** Cancer - P65Warnings.ca.gov (California only)

3746000 Adjustable Footrest

Elevates feet and permits angle repositioning while in use. 18.5" w x 11.5" d x 8" high. Shipping weight 6.0 lbs. (2.7 kg)

Please contact Labconco for ordering information on stainless steel work surfaces.

PURIFIER® NON-VENTILATED PCR ENCLOSURES

FEATURES & BENEFITS

Purifier Non-Ventilated PCR Enclosures provide a circulation-free work area designed to reduce cross contamination. These enclosures have an ultraviolet light that decontaminates surfaces and denatures trace DNA during periods of non-use. A protection panel interlocked with the UV light closes the sash opening while the UV light is in use to prevent inadvertent personnel exposure and contaminants from entering the enclosure.

The Purifier Non-Ventilated PCR Enclosures, designed for conducting polymerase chain reaction procedures, include a UV light timer that allows the user to select from eight time settings. Because these enclosures do not provide protection to the user, they should not be used in conjunction with biohazardous material, toxins or radionuclides. You and your safety officer must carefully assess the risk associated with any operation performed in a Purifier Non-Ventilated Enclosure.

Glare-free fluorescent lighting provides illumination inside the enclosure.

The 254 nm ultraviolet lamp eliminates stray DNA and provides secondary decontamination while the enclosure is not in use.

Electrical receptacle located inside the enclosure is powered by the front-mounted auxiliary switch.

Light and auxiliary electrical receptacle switches are located within easy reach of the operator. The 3-way light switch powers the fluorescent and UV light, but only one at a time, helping to protect the operator from inadvertent UV exposure.

Tempered safety glass sash is sloped 20° for less glare and closer, more comfortable viewing than vertical sashes offer. The glass is UV opaque and resistant to UV irradiation. Wiping seals reduce cross contamination inside the enclosure. The sash has a spring-loaded latch so that it may be pivoted upward and locked open for loading and cleaning.

CE mark. All 230 volt, 50 Hz models conform to the CE (European Community) requirements for electrical safety and electromagnetic compatibility.

ETL listed. All 115 volt, 60 Hz models carry the ETL mark signifying that they are certified to UL Standard 3101-1/61010-1 and CAN/CSA C22.2 No. 1010.1.

Two convenient utility ports with iris openings allow passage of tubing and electrical cords from equipment inside the enclosure through the back for connection to services. Plugs are provided to seal the ports when not in use.

Protection panel interlocked with the UV light closes off the sash opening while the UV light is on and prevents contaminants from entering when the enclosure is not in use.

Accessory Solid Epoxy Dished Work Surface. See page 26 for ordering information.

Variable digital timer provides timed UV light exposure. From the front-mounted control panel, the operator may select from eight settings in minutes of 5, 10, 15, 30, 60, 120, 240 and continuous. When the UV light switch is activated, the previously selected time setting is automatically initiated or the user may select a different setting. An amber LED indicator blinks for the duration of the setting.

 Exclusive feature

PURIFIER® NON-VENTILATED PCR ENCLOSURES

ORDERING INFORMATION

Standard Features

- UV-resistant, glacier white and gray powder-coated aluminum and steel construction
- UV-opaque and resistant, 1/4" thick tempered safety glass sash and sides
 - 7.8" high sash opening
- Ergonomic 20° angled and hinged sash that pivots upward, locks to a loading height of 20" and has wiping seals to reduce cross contamination
- Protection panel with UV light interlock to close the sash opening
 - Fluorescent lamp
 - 254 nm UV lamp
 - Interior electrical receptacle
- Variable digital timer for UV exposure with eight settings in minutes of 5, 10, 15, 30, 60, 120, 240 and continuous
 - Front-mounted switches for 3-way light (fluorescent, UV and off) and auxiliary electrical receptacle
 - Two utility ports with iris openings and plugs
 - ETL listing, UL 3101-1/61010-1 and CAN/CSA C22.2 No. 1010.1 conformity (115 volt models)
 - CE Conformity Marking (230 volt models)
 - One year warranty on parts and labor

Purifier Non-Ventilated PCR Enclosure 3952400 on Solid Epoxy Dished Work Surface 3908402 and Telescoping Base Stand 3747012 with Ergonomic Chair 3744000 and Adjustable Footrest 3746000.

Required Accessories

- Supporting work surface. Place on existing casework or see page 26.
- Supporting base. Place on existing casework or see pages 28-29.

See page 26 for dimensional drawings.

PURIFIER® NON-VENTILATED PCR ENCLOSURES

DIMENSIONS & ACCESSORIES

Solid Epoxy Dished Work Surface

Black chemical-resistant work surface is contoured to fit the dimensions of the Purifier Non-Ventilated PCR Enclosure and Tissue Culture Enclosure and to contain spills.

Catalog #	For use with	Dimensions	Shipping Weight
3908402	Non-Ventilated PCR & Tissue Culture Enclosures	48.0" w x 26.7" d x 1.0" h (122 cm x 67.8 cm x 2.5 cm)	96 lbs. (44 kg)

3744000 Ergonomic Chair with Armrests

Chair has 6-way articulating seat and back control for personalized adjustment. Pneumatic mechanism adjusts seat height from 18.25" to 25.75". Shipping weight 43.0 lbs. (19.5 kg). See page 27 for more information. **⚠WARNING:** Cancer - P65Warnings.ca.gov (California only)

Telescoping Base Stands

Powder-coated steel. Adjust in 1" increments from 27.5" to 33.5" high. Available with fixed leveling feet or casters. See pages 28-29 for more information.

3746000 Adjustable Footrest

Elevates feet and permits angle repositioning while in use. 18.5" w x 11.5" d x 8" high. Shipping weight 6.0 lbs. (2.7 kg)

ACCESSORIES

Coated Steel Blowers for Canopy-Ducted Purifier Class I and HEPA Filtered Enclosures

A remote blower or house exhaust is required when canopy-ducting the Purifier Class I Safety Enclosure or Purifier HEPA Filtered Enclosure. Phenolic-coated impeller and housing, powder-coated steel

base and weather cover, belt-drive motor with adjustable sheave and self-adjusting gravity belt tightener, flow-through vent holes and louvers, lubricated pillow block bearings, and variable exhaust orientation (vertical discharge is recommended). Blower inlet is 10.87" OD and is sized to accept 10" nominal diameter PVC duct. Blower outlet is 5.5" d x 10.0" w. Contact Labconco for ordering information on Remote Blowers with other equivalent duct lengths or diameters or other electrical configurations.

ERGONOMIC CHAIR

The Ergonomic Chair provides comfortable seating and may be used throughout the laboratory.

Standard Features

- 6-way articulating seat and back control for personalized adjustment.
- Pneumatic mechanism seat height adjustment from 18.25" to 25.75".
- Five-leg black reinforced composite base with 2" diameter ball-bearing casters.
- Aluminum support ring.
- Removable armrests.
- Black vinyl upholstery.

Catalog #	Description	Shipping Weight
3744000	Ergonomic Chair with Armrests ⚠️ WARNING: Cancer - P65Warnings.ca.gov (California only)	43.0 lbs. (19.5 kg)

TELESCOPING BASE STANDS

These stands have telescoping legs so that they may be adjusted to eight height positions.* The stands are available with fixed feet or casters for mobility.

Standard Features

- Support any Purifier Clean Bench or Enclosure.
- Models with fixed feet support loads up to 4,000 pounds (1814 kg). Models with casters support load up to 1,000 pounds (454 kg).
- ADA-compliant.
- Durable 1.75" tubular, powder-coated steel frame. Models 3' wide and larger have rear crossbar supports.
- Telescoping legs are adjustable to eight height positions in 1" increments from 27.5" to 34.5".*
- Available with fixed leveling feet or 5" diameter, toe-locking, non-marking polyurethane casters with bearings for quiet operation.

3730500 Caster Kit

For converting Telescoping Base Stands with Fixed Feet. Kit includes four 5" diameter, non-marking polyurethane casters with bearings and toe locks. Load rating for each caster is 250 pounds. **Installation is required.** Shipping weight 10 lbs. (5 kg)

Top to Bottom:

Telescoping Base Stand with Fixed Feet 3746702.

Telescoping Base Stand with Casters 3746710.

Telescoping Base Stand with Fixed Feet 3888700.

ELECTRIC & MANUAL HYDRAULIC LIFT BASE STANDS

These stands have a built-in hydraulic lift so that height may be adjusted at any time. They allow you to position the stand and the safety enclosure or clean bench it supports to accommodate persons wheelchair bound or of different heights, to transport equipment through doorways, and for easier service access.

Standard Features

- Support Purifier Class I Safety Enclosures, Purifier HEPA Filtered Enclosures, Purifier Vertical Clean Benches and Purifier Filtered PCR Enclosures.
- Support loads up to 1,000 pounds (454 kg).
- ADA-compliant.
- Durable 1.75" tubular, powder-coated steel frame with rear crossbar supports. Sub-frame is 2.0" x 3.0".
- Height is infinitely adjustable from 25.5" to 33.5" high.
- Include four powder-coated, die-cast feet with levelers.
- Include front-accessible up/down switch (Electric Lift models)
- Include front-accessible hand crank. Turning the crank clockwise raises the stand; counterclockwise lowers it. The handle may be disengaged and folded under, out of the way, when not in use. (Manual Lift models)

Manual Hydraulic Lift Base Stand 3780304.

Electric Lift

Manual Lift

Caster Kit 3784000

Casters add mobility to the Hydraulic Lift Base Stand. Kit includes four 5" diameter, non-marking polyurethane casters with toe locks. Load rating for each caster is 250 pounds. Casters have bearings for quiet operation. Casters replace the fixed feet that are included with the stand. **Installation is required.** Not for use with stands that support hard-ducted enclosures. 10 lbs. (5 kg)
