

XPert[®] Balance & Bulk Powder Enclosures

Protecting your
laboratory environment

LABCONCO

XPert® Balance Enclosures and Bulk Powder Enclosures OVERVIEW

Patented XPert line of Balance Enclosures and Bulk Powder Enclosures maximizes containment of toxic airborne powders and other particulates as well as fumes and vapors. XPert Enclosures are well suited for pharmaceutical research and other laboratory applications involving weighing or bulk transfer of toxic substances. The innovative, aerodynamic designs of the air foil, upper sash foil, zone-perforated rear baffle and side-entry air foils work together to significantly reduce concentrations of contaminants in the operator's breathing zone. Labconco engineers carefully selected materials of construction and design details that support safe, energy-efficient toxic substance handling.*

The XPert line of Balance Enclosures maximizes containment of hazardous particulates during weighing operations.

XPert® Balance Enclosures and Bulk Powder Enclosures

OVERVIEW

Containment-Enhancing Features

Side-view illustration of XPert Balance Enclosure depicting laminar airflow

Clean-Sweep™ Air Foil

The aerodynamic air foil allows air to sweep the work surface for maximum containment. Clean-Sweep openings pull inflow air from under the air foil so that clean air continually flows through the air foil creating a constant protective contaminant barrier. Should the operator inadvertently block the airflow, air continues to pass under the air foil and through the Clean-Sweep openings.

Side-Entry Air Foils

Aerodynamic air foils located on either side of the sash opening direct clean airflow into the chamber.

Upper Dilution Air Supply

The upper dilution air supply introduces air from above the work area, which

bathes the back of the sash with clean air and directs concentrations away from the sash opening.

Upper Containment Sash Foil

A small gap directly above the aerodynamic sash handle allows high velocity air to bleed into the chamber, reducing turbulence and directing concentrations away from the user's breathing zone.

XPert® Balance Enclosures and Bulk Powder Enclosures

OVERVIEW

Table 1
Surface Resistivity

Material	Surface Resistivity	Example
Conductive	0 – 10 ⁵ Ω per square	Skin, Metals
Static Dissipative	10 ⁵ – 10 ⁹ Ω per square	Glass
Antistatic	10 ⁹ – 10 ¹² Ω per square	Polyethylene Bag
Insulative	≥10 ¹² Ω per square	Acrylic Box, Packing Foam, Styrofoam

Since static electricity is a surface phenomenon, materials can be classified by their surface resistivity measured in ohms per square. The table above lists the surface resistivity of various classes of material. Glass and metal have less surface resistivity than acrylic.

Patented* Zone-Perforated Rear Baffle

The baffle with three zoned sections of perforations directs inflow air in non-turbulent laminar air streams from the

sash opening to the baffle in a single pass. The lower section provides more airflow at the bottom to help minimize the potential for air to roll forward toward the sash opening.

Static-Dissipating Construction

Static charges can lead to errors in weighing and particulates being attracted to surfaces, resulting in greater potential for cross-contamination and loss of containment. Unlike acrylic, which is highly insulative and has a strong affinity for charged particles, XPert Enclosures are constructed of static-dissipative tempered safety glass and epoxy-coated metal. (Table 1)

Verified Performance

Independent tests were performed to verify the powder containment and balance stability of XPert Enclosures. These test results are included in the Validation Package, which is available upon request.

Containment-enhancing features allow XPert Enclosures to operate at face velocities from 60 to 100 fpm. Independent testing confirms that the XPert Balance Enclosures contains both particulate and gaseous contaminants.

SafeBridge Consultants, Incorporated

verified the performance of the XPert Balance Enclosures, XPert Filtered Balance System and XPert Bulk Powder Filtered System confirming their ability to provide excellent containment of powders.

Naproxen sodium, a non-potent active pharmaceutical ingredient, was selected for the study because it is safe to handle, readily detectable in air at low concentrations, has a high dustiness quotient and challenging electrostatic properties. The XPert Balance Enclosures and XPert Filtered Systems demonstrated effective containment when repeated small scale weighing operations were performed by different operators with varied levels of work practice. The enclosures demonstrated excellent containment when used by operators using proper technique. While no enclosure can compensate for improper technique, these tests confirm that the XPert Balance Enclosure, XPert Filtered Balance System and XPert Bulk Powder Filtered System provide safe working environments.

ECT, Incorporated conducted modified ASHRAE 110-1995 testing on the XPert Balance Enclosure and Labconco Corporation conducted modified ASHRAE 110-1995 testing on the XPert Filtered Balance Systems and Stations. Both concluded that the enclosures maintained containment at face velocities greater than

50 fpm. Average concentrations during tracer gas tests were less than 0.05 ppm and no escape was observed during the smoke tests. Since Labconco recommends a minimum face velocity of 60 fpm, the acceptable containment at 50 fpm provides a margin of safety. The built-in airflow monitor, digital or analog depending on the enclosure, alerts the user should velocity approach 50 fpm.

Chemir Analytical Services conducted balance stability tests on the XPert Filtered Balance System mounted on a Solid Epoxy Work Surface. No marble slab was used.

The enclosure was tested while operating at three face velocities — 0, 78 fpm (factory setting), and 100 fpm. Samples of 5 mg, 50 mg and 100 mg were weighed on an analytical balance located inside the enclosure. Test results were excellent and confirm that the XPert Filtered Balance System, including its built-in blower and the airflow through the enclosure, caused no detectable instability to the balance. The weight of each sample was stable to five decimal places.

Bag-In/Bag-Out HEPA Filter Disposal System

Unique to the XPert Filtered Systems, XPert Filtered Stations and FilterMate Portable Exhausters is the true bag-in/

bag-out HEPA filter system. Using a built-in sealed bag with gloves, a technician can remove a contaminated filter without exposing the filter or contaminated plenum to personnel or the environment. On XPert Filtered Balance Systems and

*U.S. Patent No. 6,461,233

XPert® Balance Enclosures and Bulk Powder Enclosures

OVERVIEW

The XPert Filtered Balance System is available in 2', 3', 4', 5' and 6' widths.

Since the XPert Filtered Balance System includes a built-in blower and HEPA filter mounted in the upper plenum, no outside ducting is required.

Stations, the filter is accessible by removing the front panel. On FilterMate Portable Exhausters the filter is accessible from the back without detaching the FilterMate from the XPert Balance Enclosure.

Select the Right XPert for Your Application

The XPert line of balance enclosures was designed to provide user protection during weighing operations that generate toxic airborne particulates. Interior dimensions of any XPert enclosure accommodate large micro or analytical balances.

The XPert line of bulk powder enclosures was designed to provide user protection from toxic airborne particulates generated during bulk powder transfer and weighing operations. Selecting the right XPert enclosure depends on factors such as the user's application, airborne containment removal needs, space limitations and ducting options.

XPert Filtered Balance Systems and Bulk Powder Systems are self-contained enclosures with a built-in blower and HEPA filter mounted above the work area. Because a separate blower module is not required, these enclosures require less overall bench space than other models. Since HEPA filtered air may be returned to the laboratory, XPert Filtered Systems are ideal for installations in areas surrounded by interior walls or where ducting is not feasible. Accessory Trace Odor Carbon Filters may be used with these enclosures to trap small amounts of gas from organic solvents, aldehydes or amines used in conjunction with particulate-generating work. XPert Filtered Balance Systems are available in 2', 3', 4', 5' and 6' widths. XPert Filtered Bulk Powder Systems are available in 5' and 6' widths.

XPert Filtered Balance Stations and Bulk Powder Stations are designed to be connected to a remote blower and ducted to the outside. The remote blower,

which is sold separately, must be sized to fit individual requirements for face velocity and duct run. A HEPA filter installed in these enclosures' upper plenum traps particulate contaminants in the exhaust air. Because exhaust air does not return to the room, XPert Filtered Balance Stations may be used to remove light chemical fumes or to control odors. These enclosures have the same compact footprint as XPert Filtered Balance Systems. Since they are ducted to the outside, they require a permanent location in the laboratory, or a flexible hose connected to a house exhaust. XPert Filtered Balance Stations are available in 2', 3', 4', 5' and 6' widths. XPert Filtered Bulk Powder Stations are available in 5' and 6' widths.

XPert Balance and Bulk Powder Enclosures feature flexible ducting options. Collars on the top and bottom allow connection to ductwork and remote blower for exhausting to the outside. Use of the bottom exhaust collar hides the

XPert® Balance Enclosures and Bulk Powder Enclosures

OVERVIEW

ductwork behind casework, enhancing visibility throughout the laboratory. Depending on the application, XPert Enclosures that are hard-ducted to the outside may require an in-line HEPA filter.

If outside ducting is not feasible, the XPert Balance Enclosure may be connected from the top or bottom to the FilterMate Portable Exhauster, which houses a HEPA filter, carbon filter or combination of both filters. The FilterMate provides up to 100 fpm face velocity for the XPert

Enclosure and only one FilterMate is needed for any 2', 3' or 4' XPert. Multiple FilterMates may be connected to XPert Enclosures in 5', 6' or 8' widths. Since FilterMate Portable Exhausters accommodate large carbon filters with longer dwell times than the Trace Odor Filters used with the XPert Filtered Systems, XPert Enclosures connected to FilterMate Portable Exhausters may be used with a wide variety of applications involving organic solvents, formaldehyde, ammonia or amines. See page 38 for an Application

Matrix. XPert Balance Enclosures are available in 2', 3', 4', 5', 6' and 8' widths. XPert Bulk Powder Enclosures are available in 5', 6' and 8' widths.

Labconco also offers the **XPert Easy-Order** consisting of the XPert Balance Enclosure, Black Solid Epoxy Work Surface and FilterMate Portable Exhauster with HEPA Filter. Add a supporting base and the XPert Easy-Order has all the components necessary to make a complete system. XPert Easy-Order is offered in 2', 3' and 4' widths.

The XPert Easy-Order includes the XPert Balance Enclosure, Black Solid Epoxy Work Surface and FilterMate Portable Exhauster. Supporting base is not included.

The XPert line of Bulk Powder Enclosures include the 6' XPert Bulk Powder Filtered System shown above as well as the XPert Bulk Powder Filtered Stations and Enclosures. All models include an integral base stand, airflow monitor, transfer caddy, push button-operated electric hydraulic lift mechanism, and left side-mounted waste chute.

XPert® Balance Enclosures and Bulk Powder Enclosures SELECTION GUIDES

The Selection Guide below provides at-a-glance descriptions of the various XPert Balance Enclosures offered in this catalog.

Balance Enclosure Selection Guide				
	XPert Filtered Balance System	XPert Filtered Balance Station with Remote Blower	XPert Balance Enclosure with FilterMate Portable Exhauster or XPert Easy-Order	XPert Balance Enclosure with Remote Blower
	Pages 8-13	Pages 14-19	Pages 20-27	Pages 20-27
Exterior Nominal Widths	2', 3', 4', 5', 6'	2', 3', 4', 5', 6'	2', 3', 4'	2', 3', 4', 5', 6', 8'
Exhausts to:	Room or Outside*	Outside	Room or Outside**	Outside

XPert® Filtered Balance Systems

FEATURES & BENEFITS

XPert Filtered Balance Systems provide user protection by keeping powders and particulates contained during procedures involving powders. **The built-in blower and exhaust HEPA filter mounted in the upper plenum conserves space while isolation supports minimize blower vibration.** Since HEPA filtered air is returned to the laboratory, these enclosures have the

added benefits of low installation costs, portability and no required outside ducting. Interior dimensions accommodate large analytical and micro balances. Containment-enhancing features ensure that potent powders frequently found in pharmaceutical, dry chemical, and industrial hygiene applications are kept away from the operator. Systems are available in 2', 3', 4', 5' and 6' widths.

True bag-in/bag-out HEPA filter disposal system allows for safe filter replacement. See page 4.

Space-saving design. Impeller and HEPA filter are contained within the enclosure's upper plenum for a smaller overall footprint than a separate enclosure and exhauster can offer.

Built-in airflow monitor alerts the user to face velocities outside of preset range. Models without monitor are also available.

Quiet operation as low as 48 decibels.

Optimal HEPA filter location permits leak-detection scan of entire surface.

Static-dissipative epoxy-coated aluminum frame and steel rear plenum and baffle. No unreliable plastic-to-plastic bonding is used.

Front-mounted pressure gauge helps determine HEPA filter loading.

Upper dilution air supply sweeps clean air to the back of sash to keep contaminants away from the operator. See page 3.

Tempered safety glass provides better fire, scratch and chemical resistance than acrylic and dissipates static charge.

Ergonomic angled sash for comfortable viewing.

Side-entry air foils allow air to sweep interior surfaces to enhance containment. See page 3.

Upper containment sash foil directs contaminants away from the user's breathing zone. See page 3.

Deep 23.4" interior easily accommodates large analytical balances. Some 5' and 6' models are available with 30" interior depths.

Patented* Clean-Sweep™ air foil allows air to sweep the work surface to maximize containment. See page 3.

Built-in impeller has vibration-isolation supports to minimize disturbance to sensitive balances.

Intrinsically safe. The positive pressure impeller is surrounded by a negative pressure plenum so that if a leak should develop, the unfiltered air is captured and refiltered.

Patented* rear baffle with zones of perforations promotes horizontal laminar airflow. See page 4. The baffle pivots down for cleaning.

Optional left-side mounted waste chute isolates contaminated waste in a sealable bag. Some 5' and 6' models include a waste chute. Contact Labconco for ordering information on other models.

Exclusive feature
*U.S. Patent No. 6,461,233

XPert® Filtered Balance Systems

SPECIFICATIONS

XPert Filtered Balance System 3950402 is shown with Black Solid Epoxy Dished Work Surface 3909902 and Protector Standard Storage Cabinets 9900300. Work surface and base cabinet must be ordered separately.

- Intrinsically safe, negative pressure design.
- Pressure gauge.
- Space-saving design. No separate filtered exhauster is required.
- Upper diffuser screen.
- Quiet operation (see chart below).
- Glacier white and gray, dry powder epoxy-coated aluminum frame and steel rear plenum and baffle. No unreliable plastic-to-plastic bonding is used.

- Pre-wired fluorescent lamp and switches for blower and light.
- 1/4" thick tempered safety glass front sash and sides.
- Ergonomic angled and hinged, pivoting sash with wiping seal. Sashes on 5' and 6' models incorporate an external gas-assist lift.

- Models with 9.4" sash opening height have 16.5" locking height and 19.0" maximum loading height. Models with 12.0" sash opening height have 25.75" locking height and 28.25" maximum loading height.
- Two utility ports for pass-through of electrical cords.
- Particulate containment independently verified by SafeBridge Consultants, Inc.
- Validation package available at www.labconco.com containing balance stability, powder containment and modified ASHRAE 110-1995 Test Reports; Installation Qualification/Operation Qualification (IQ/OQ) Protocol; and Maintenance Log.

All models feature:

- Deep interior of 23.4" or 30.0" depending on the model.
- Ergonomic air foil with aerodynamic Clean-Sweep* airflow openings.
- Upper dilution air supply.
- Upper containment sash foil.
- Zone-perforated, pivoting rear baffle.*
- Side-entry air foils.
 - Exhaust HEPA filter, 99.99% efficient on particles 0.3 micron in size.
- Top-accessible HEPA filter for leak scanning of entire surface.
- True bag-in/bag-out filter disposal system (requires certified technician).
- Built-in blower with dynamically-balanced, vibration-isolated motorized impeller and speed control. Blower has a 40% reserve so that the speed may be adjusted as needed by a certified technician as the filter loads.

Exclusive feature

*U.S. Patent No. 6,461,233

- UL 3101-1/61010-1
- CAN/CSA C22.2 No. 1010.1
- CE Conformity Marking (230 volt models)

Models with Guardian Airflow Monitor include:

- Guardian Airflow Monitor that continuously monitors airflow with a green LED that glows when airflow is within set point range and a red LED that glows and an audible alarm that sounds when airflow is outside set point range.

Models with Guardian 1000 Digital Airflow Monitor include:

- Guardian 1000 Digital Airflow Monitor that continuously monitors airflow and provides a digital readout of actual face velocity. An audible/visual alarm alerts the operator when airflow is outside set point range. RS232 communications port allows connection to user-supplied computer.

5' and 6' models with 35.5" exterior depth include:

- Left-side mounted waste chute. Bags not included. Minimum bag size required: 10" x 16".

All models require:

- Work surface. See page 41.
- Supporting base. See pages 39-40.

Optional accessories for on-site installation include:

- Trace Odor Carbon Filters. See page 41.
- Utility Shelves, Bottle Holder and Tissue Holder. See page 42.
- Canopy Connections. See page 43.
- Remote Blowers. See page 44.
- Ductwork. See pages 45-46.
- Waste Chute Bags. Contact your laboratory supply dealer.

All models conform to the following regulations and standards:

- SEFA 1-2002
- Modified ASHRAE 110-1995
- ANSI Z9.5-1993

XPert® Filtered Balance Stations

FEATURES & BENEFITS

XPert Filtered Balance Stations are designed to protect the user during procedures involving powders and gases. The built-in HEPA filter, mounted in the upper plenum, removes particulates, so that clean air is exhausted to the atmosphere. As its name implies, **the XPert Filtered Balance Station is “stationary” because ducting to an outside blower is required.**

Powder weighing applications found in pharmaceutical research and other industries are typical for these enclosures. Like all enclosures in the XPert line, interior dimensions accommodate large micro and analytical balances and containment-enhancing features ensure personnel safety.

Front-mounted pressure gauge helps determine HEPA filter loading.

Exhaust collar allows connection to ductwork and remote blower.

Static-dissipative epoxy-coated aluminum frame and steel rear plenum and baffle. No unreliable plastic-to-plastic bonding is used.

Built-in airflow monitor alerts the user to face velocities outside of preset range. Models without monitor are also available.

Upper dilution air supply sweeps clean air to the back of sash to keep contaminants away from the operator. See page 3.

Ergonomic angled sash for comfortable viewing.

Tempered safety glass provides better fire, scratch and chemical resistance than acrylic and dissipates static charge.

Upper containment sash foil directs contaminants away from the user's breathing zone. See page 3.

Patented* Clean-Sweep™ air foil allows air to sweep the work surface to maximize containment. See page 3.

True bag-in/bag-out HEPA filter disposal system allows for safe replacement. See page 4.

Side-entry air foils allow air to sweep interior surfaces to enhance containment. See page 3.

Deep 23.4" interior easily accommodates large analytical balances. Some 5' and 6' models are available with 30" interior depths.

Patented* rear baffle with zones of perforations promotes horizontal laminar airflow. See page 4. The baffle pivots down for cleaning.

Optional left-side mounted waste chute isolates contaminated waste in a sealable bag. Some 5' and 6' models include a waste chute. Contact Labconco for ordering information on other models.

Exclusive feature
*U.S. Patent No. 6,461,233

XPert® Filtered Balance Stations

SPECIFICATIONS

XPert Filtered Balance Station 3940301 is shown with Black Solid Epoxy Dished Work Surface 3909902 and Protector Standard Storage Cabinets 9900300. Work surface, base cabinet, blower and ductwork must be ordered separately.

- Pre-wired fluorescent lamp and switches for remote blower and light. Blower switch is connected to an electrical relay and junction box behind the front panel.
- 1/4" thick tempered safety glass front sash and sides.
- Ergonomic angled and hinged, pivoting sash with wiping seal. Sashes on 5' and 6' models incorporate an external gas-assist lift.
- Models with 9.4" sash opening height have 16.5" locking height and 19.0" maximum loading height. Models with 12.0" sash opening height have 25.75" locking height and 28.25" maximum loading height.
- Two utility ports for pass-through of electrical cords.
- Particulate containment independently verified by SafeBridge Consultants, Inc.
- Validation package available at www.labconco.com containing balance stability, powder containment and modified ASHRAE 110-1995 Test Reports; Installation Qualification/Operation Qualification (IQ/OQ) Protocol; and Maintenance Log.
- Exhaust collar.

All models feature:

- Deep interior or 23.4" or 30.0" depending on the model.
- Ergonomic air foil with aerodynamic Clean-Sweep* airflow openings.
- Upper dilution air supply.
- Upper containment sash foil.
- Zone-perforated, pivoting rear baffle.*
- Side-entry air foils.
 - Exhaust HEPA filter, 99.99% efficient on particles 0.3 micron in size.
- Top-accessible HEPA filter for leak scanning of entire surface.
- True bag-in/bag-out filter disposal system (requires certified technician).
 - Pressure gauge.
 - Upper diffuser screen.
 - Glacier white and gray, dry powder epoxy-coated aluminum frame and steel rear plenum and baffle. No unreliable plastic-to-plastic bonding is used.

All models conform to the following regulations and standards:

- SEFA 1-2002
- Modified ASHRAE 110-1995
- ANSI Z9.5-1993
- UL 3101-1/61010-1
- CAN/CSA C22.2 No. 1010.1
- CE Conformity Marking (230 volt models)

Models with Guardian Airflow Monitor include:

- Guardian Airflow Monitor that continuously monitors airflow with a green LED that glows when airflow is within set point range and a red LED that glows and an audible alarm that sounds when airflow is outside set point range.

Models with Guardian 1000 Digital Airflow Monitor include:

- Guardian 1000 Digital Airflow Monitor that continuously monitors airflow and provides a digital readout of actual face velocity. An audible/visual alarm alerts the operator when airflow is outside set point range. RS232 communications port allows connection to user-supplied computer.

5' and 6' models with 35.5" exterior depth include:

- Left-side mounted waste chute. Bags not included. Minimum bag size required: 10" x 16".

All models require:

- Work surface. See page 41.
- Supporting base. See pages 39-40.
- Remote blower. See page 44.
- Ductwork. See pages 45-46.

Optional accessories for on-site installation include:

- Utility Shelves, Bottle Holder and Tissue Holder. See page 42.
- Waste Chute Bags. Contact your laboratory supply dealer.

XPert® Balance Enclosures

FEATURES & BENEFITS

XPert Balance Enclosures provide user protection by keeping powders, particulates and fumes contained. Interior dimensions accommodate large micro and analytical balances. With their low profile, these enclosures exhaust less tempered room air than traditional fume hoods, conserving energy. They have no switches, wiring or service fixtures that can add significant costs.

XPert Balance Enclosures require venting. They may be connected to a remote blower and exhausted to the outside. When connected to the XPert Balance Enclosure, FilterMate Portable Exhausters provide an alternative to outside ducting. With a HEPA and/or carbon filter installed, the FilterMate rids the work area of hazardous particulates and/or fumes and vapors. No outside ducting is required.

Tempered safety glass front sash, sides and top offer excellent visibility, ambient light and protection. Glass provides better fire, scratch and chemical resistance than acrylic and dissipates static charge.

Flexible exhaust options. Exhaust openings at top and bottom permit connections to ductwork for outside exhausting or to a FilterMate™ Portable Exhauster. Using the bottom exhaust opening keeps ductwork hidden, maximizing room visibility.

Built-in airflow monitor alerts the user to face velocities outside of preset range. Models without monitor are also available.

Deep 23.4" interior easily accommodates large analytical balances. Some 5' and 6' models are available with 30" interior depths.

Upper dilution air supply sweeps clean air to the back of sash to keep contaminants away from the operator. See page 3.

Ergonomic angled sash for comfortable viewing.

Upper containment sash foil directs contaminants away from the user's breathing zone. See page 3.

Side-entry air foils allow air to sweep across the interior surfaces to enhance containment. See page 3.

8", 10" or 12" high sash opening limits exhaust demand, conserves costly tempered room air and requires a smaller remote blower than most fume hoods.

Static-dissipative epoxy-coated aluminum frame and steel rear plenum and baffle. No unreliable plastic-to-plastic bonding is used.

Patented* Clean-Sweep™ air foil allows air to sweep the work surface to maximize containment. See page 3.

Patented* rear baffle with zones of perforations promotes horizontal laminar airflow. See page 4. The baffle pivots down for cleaning.

Optional left-side mounted waste chute isolates contaminated waste in a sealable bag. Some 5', 6' and 8' models include a waste chute. Contact Labconco for ordering information on other models.

XPert® Balance Enclosures

SPECIFICATIONS

XPert Balance Enclosure 3971802 is shown with Stainless Steel Work Surface 3975800 and Protector Standard Storage Cabinets 9904300 and 9904000. Work Surface, base cabinets, blower and ductwork or FilterMate Portable Exhausters must be ordered separately.

All models feature:

- Deep interior of 23.4" or 30.0" depending on the model.
- Ergonomic air foil with aerodynamic Clean-Sweep* airflow openings.
- Upper dilution air supply.
- Upper containment sash foil.
- Zone-perforated, pivoting rear baffle.*
- Side-entry air foils.
- Glacier white and gray, dry powder epoxy-coated aluminum frame and steel rear plenum and baffle. No unreliable plastic-to-plastic bonding is used.
- 1/4" thick tempered safety glass front sash, sides and top.
 - Ergonomic 20° angled and hinged, pivoting sash with wiping seal. Sashes on 5', 6' and 8' models incorporate an external gas-assist lift.
 - Models with 8.0" sash opening height have 16.5" locking height and 19.0" maximum loading height. Models with 10.0" or 12.0" sash opening height have 25.75" locking height and 28.25" maximum loading height.
 - Two utility ports for pass-through of electrical cords.
- 2" x 10" rectangular exhaust openings at the top and bottom. 5', 6' and 8' models include three openings on the top and bottom. Cover(s) provided for unused openings.
- Particulate containment independently verified by SafeBridge Consultants, Inc.
- Modified ASHRAE 110-1995 conformity independently verified by ECT, Inc.
- Validation package available at www.labconco.com containing balance stability, powder containment and modified ASHRAE 110-1995. Test Reports;

Installation Qualification/Operation Qualification (IQ/OQ) Protocol; and Maintenance Log.

All models conform to the following regulations and standards:

- SEFA 1-2002
- Modified ASHRAE 110-1995
- ANSI Z9.5-1993

Models with Guardian 500 Airflow Monitor include:

- Guardian 500 Airflow Monitor that continuously monitors airflow with a green LED that glows when airflow is within set point range and a red LED that glows and an audible alarm that sounds when airflow is outside set point range. Includes epoxy-coated steel housing for mounting.

Exclusive feature *U.S. Patent No. 6,461,233

Models with Guardian 1000 Digital Airflow Monitor include:

- Guardian 1000 Digital Airflow Monitor that continuously monitors airflow and provides a digital readout of actual face velocity. An audible/visual alarm alerts the operator when airflow is outside set point range. RS232 communications port allows connection to user-supplied computer and may be configured for external input connections such as night setback or external alarm and up to three output relays. Includes epoxy-coated steel housing for mounting.

5', 6' and 8' models with 35.5" exterior depth include:

- Left-side mounted waste chute. Bags not included. Minimum bag size required: 10" x 16".

All models require:

- FilterMate Portable Exhauster(s) or remote blower (each sold separately). See pages 36-37 and 44.
- Work surface. See page 41.
- Supporting base. See pages 39-40.
- Ductwork. See pages 45-46 and inside back cover.

Optional accessories for on-site installation include:

- Fluorescent Lights. See page 42.
- Utility Shelves, Bottle Holder and Tissue Holder. See page 42.
- Transition Adapters. See page 43.
- Waste Chute Bags. Contact your laboratory supply dealer.

*International electrical configuration

XPert Filtered Balance Enclosure 3930302 is shown with Black Solid Epoxy Work Surface 3908401 and Protector Standard Storage Cabinet 9900100. Work Surface, base cabinet, blower and ductwork or FilterMate Portable Exhauster must be ordered separately.

Requires Ductwork and Blower

TOP (2', 3', 4' MODELS)

TOP (5', 6', 8' MODELS)

5' and 6' enclosures include five covers, two on top and three on the bottom. 8' enclosures include four covers, one on top and three on the bottom.

FRONT (2', 3', 4' MODELS)

FRONT (5', 6', 8' MODELS. AIRFLOW MONITOR AND EXHAUST TRANSITION ADAPTERS NOT SHOWN.)

SIDE (ALL MODELS)

XPert® Easy-Order SPECIFICATIONS

XPert Easy-Order 3960302 is shown with Protector Standard Storage Cabinet 9900100. Base Cabinet must be ordered separately.

All models include:

- XPert Balance Enclosure
- FilterMate Portable Exhauster 3970000
- Black Solid Epoxy Dished Work Surface

Features of the XPert Balance Enclosure:

-  Deep 23.4" interior.
-  Ergonomic air foil with aerodynamic Clean-Sweep* airflow openings.
-  Upper containment sash foil.
-  Upper dilution air supply.
-  Zone-perforated, pivoting rear baffle.*
-  Side-entry air foils.
-  Glacier white and gray, dry powder epoxy-coated aluminum frame and steel rear plenum and baffle. No unreliable plastic-to-plastic bonding is used.
-  Tempered safety glass front sash, sides and top.
 - Ergonomic 20° angled and hinged, pivoting sash with wiping seal.
 - 8.0" sash opening height, 16.5" locking height and 19.0" maximum loading height.
 - Two utility ports for pass-through of electrical cords.
-  2" x 10" rectangular exhaust openings at top and bottom. Cover provided for unused opening.
- Particulate containment independently verified by SafeBridge Consultants, Inc.

 Exclusive feature

 Exclusive feature

*U.S. Patent No. 6,461,233

- Modified ASHRAE 110-1995 conformity independently verified by ECT, Inc.
- Validation package available at www.labconco.com containing balance stability, powder containment, and modified ASHRAE 110-1995. Installation Qualification/Operation Qualification (IQ/OQ) Protocol; and Maintenance Log.

Models with Guardian 500 Airflow Monitor include:

- Guardian 500 Airflow Monitor that continuously monitors airflow with a green LED that glows when airflow is within set point range and a red LED that glows and an audible alarm that sounds when airflow is outside set point range. Includes epoxy-coated steel housing.

Models with Guardian 1000 Digital Airflow Monitor include:

- Guardian 1000 Digital Airflow Monitor that continuously monitors airflow and provides a digital readout of actual face velocity. An audible/visual alarm alerts the operator when airflow is outside set point range. RS232 communications port allows connection to user-supplied computer. Includes epoxy-coated steel housing.

Features of the FilterMate Portable Exhauster 3970000:

- Compact, corrosion-resistant housing of glacier white and light gray, dry powder epoxy-coated steel with vibration-isolated rubber feet.
- Variable-speed, non-sparking motorized impeller.
-  Quiet operation. Oversized HEPA filter, efficient impeller and perforated exhaust cover work together to provide lower system exhaust velocity and noise pressure levels.

Exhaust CFM	Noise Pressure dB(A)
100	45-47
150	51-54
200	56-61
250	63-65

-  Inherently safe design. A negative pressure plenum surrounds the positive pressure impeller so that if a leak occurs, the unfiltered air is captured and refiltered.
-  Capable of filtering up to 250 CFM for efficient HEPA filtration.
 - Front-mounted rocker switch to control power to the blower.
-  Rear-mounted, auxiliary electrical outlet that may be connected to an airflow monitor or other user-supplied accessories.
-  Provides up to 100 fpm face velocity for 2', 3' or 4' enclosure.
 - HEPA filter, 99.99% efficient on particulates 0.3 micron in size.
-  True bag-in/bag-out filter disposal system for safely removing and replacing the filter without detaching the hose. The HEPA filter may be easily accessed by removing the exhaust cover for field leak testing by a certified technician.
 - Included: 8 feet of 5" ID flexible, chemical-resistant polypropylene gray hose; two clamps and a 4.88" OD Upper Transition Adapter for connection to XPert Balance Enclosure or Protector XVS Ventilation Station.
 - IEC 3-wire electrical cord with plug.

All models conform to the following regulations and standards:

- SEFA 1-2002
- Modified ASHRAE 110-1995
- ANSI Z9.5-1993
- UL 3101-1/61010-1
- CAN/CSA C22.2 No. 1010.1

All models require:

- Supporting base. See pages 39-40.

Optional accessories for on-site installation include:

- Fluorescent Lights. See page 42.
- Utility Shelves, Bottle Holder and Tissue Holder. See page 42.
- Transition Adapters. See page 43.
- Manual Duct Dampers. See page 45.
- Replacement HEPA Filter. See page 38.
- Replacement Bag for Bag-In/Bag-Out HEPA Filter. See page 38.

Ductwork and
Blower

XPert® Bulk Powder Filtered Systems, Filtered Stations & Enclosures

FEATURES & BENEFITS

XPert Bulk Powder Filtered Systems, Filtered Stations and Enclosures are designed to protect the user during powder transfer operations. Filtered Systems and Stations include a built-in HEPA filter, mounted in the upper plenum, that removes particulates in the exhaust air. XPert Filtered Systems include a built-in blower and do not require ducting to the outside. XPert Filtered

Stations have an exhaust collar and require ducting to house exhaust or a remote blower. XPert Bulk Powder Filtered Systems and Stations are available in 5' and 6' widths.

XPert Bulk Powder Enclosures require venting and may be connected to a remote blower or house exhaust and exhausted to the outside. These enclosures are available in 5', 6' and 8' widths.

Guardian 1000 digital monitor continuously monitors airflow and provides a digital readout of actual face velocity.

Front-mounted pressure gauge helps determine HEPA filter loading (Filtered Systems and Stations).

Stainless steel work surface has front trough to catch liquid spills.

Upper dilution air supply sweeps clean air to the back of sash to keep contaminants away from the operator. See page 3.

Tempered safety glass provides better fire, scratch and chemical resistance than acrylic and dissipates static charge.

Optimal HEPA filter location permits leak-detection scan of entire filter surface (Filtered Systems and Stations).

Side-entry air foils allow air to sweep interior surfaces to enhance containment. See page 3.

Push button-controlled electric hydraulic lift mechanism raises the container to the optimal ergonomic height. An electronic beam senses the location of the container and triggers the lift mechanism to automatically stop when the optimal height is reached.*

Transfer caddy is included. Caddy allows for easy transport of a source container to the enclosure's work area. It has a latch and positioning plate to ensure proper alignment with the work surface access opening.*

Patented* rear baffle with zones of perforations promotes horizontal laminar airflow. See page 4. The baffle pivots down for cleaning.

Exclusive feature * Patent pending

Optional left-side mounted waste chute isolates contaminated waste in a sealable bag.

True bag-in/bag-out HEPA filter disposal system allows for safe filter replacement (Filtered Systems and Stations). See page 4.

Base stand is included.

XPert® Bulk Powder Filtered Systems

SPECIFICATIONS

XPert Bulk Powder Filtered System 3961502 with Retaining Ring 3981300, Safety Sleeve 3981100 and Retaining Band 3981200.

All models feature:

- Ergonomic air foil with aerodynamic Clean-Sweep* airflow openings.
- Upper dilution air supply.
- Upper containment sash foil.
- Zone-perforated, pivoting rear baffle.*
 - Side-entry air foils.
 - Generous 30" interior depth and 32" interior height.
 - Exhaust HEPA filter, 99.99% efficient on particles 0.3 micron in size.
- Access to entire HEPA filter surface from top for filter leak scanning (by certified technician).
- True bag-in/bag-out filter disposal system (by certified technician).
 - Guardian 1000 Digital Airflow Monitor that continuously monitors airflow and provides a digital readout of actual face velocity. An audible/visual alarm alerts the operator when airflow is outside set point range. RS232 communications port allows connection to user-supplied computer and may be configured for external input connections such as night setback or external alarm and up to three output relays.
- Stainless steel work surface with front spill trough and right-side, center or left-side access opening for source container (drum).

- 2" square tubular steel base stand with leveling feet.
- Transfer caddy of glacier white, epoxy-coated 1" square tubular steel frame with 3" diameter caster that holds container up to 28" high x 19.5" dia. With caddy latch and positioning plate.**
- Push-button operated electric hydraulic lift mechanism for raising the container to the optimal ergonomic height (14" maximum travel distance).**
- Electronic beam to sense the location of the container and trigger the lift mechanism to automatically stop at the optimal access height.**
- Left side-mounted waste chute. Bags not included. Minimum bag size required: 10" x 16".
- Fourplex electrical receptacle located underneath the work surface.
- Intrinsically safe, negative pressure design.
- Pressure gauge.
- Space-saving design. No separate filtered exhauster is required.
- Upper diffuser screen.
- Quiet operation (see chart below).
- Glacier white and gray, dry powder epoxy-coated aluminum frame and steel rear plenum and baffle. No unreliable plastic-to-plastic bonding is used.
- Pre-wired fluorescent lamp and switches for blower and light.
- 1/4" thick tempered safety glass front sash and sides.
- Ergonomic angled and hinged, pivoting sash with wiping seal, external gas-assist lift, 12.0" sash opening height, 25.75" locking height and 28.25" maximum loading height.
- Two utility ports for pass-through of electrical cords.
- Shipped in two sections.
- No ducting is required. Filtered exhaust air is returned to the laboratory. Or System may be exhausted to the outside with the addition of the optional Canopy Connection.
- Particulate containment independently verified by SafeBridge Consultants, Inc.
- Validation package available at www.labconco.com with powder containment and modified ASHRAE 110-1995 Test Reports; Installation Qualification/Operation Qualification (IQ/OQ) Protocol; and Maintenance Log.

All models conform to the following regulations and standards:

- SEFA 1-2002
- Modified ASHRAE 110-1995
- ANSI Z9.5-1993
- UL 3101-1/61010-1
- CAN/CSA C22.2 No. 1010.1
- CE Conformity Marking (230 volt models)

All models require:

- Retaining Ring**+. See page 43.
- Safety Sleeves**. See page 43.
- Retaining Bands**. See page 43.
- Access Opening Cover. See page 43.
- Waste Chute Bags. Contact your laboratory supply dealer.

Optional accessories for on-site installation include:

- Additional Transfer Caddy. See page 43.
- Trace Odor Carbon Filters. See page 41.
- Utility Shelves, Bottle Holder and Tissue Holder. See page 42.
- Canopy Connections. See page 43.
- Remote Blowers. See page 44.
- Ductwork. See pages 45-46.

Exclusive feature

* U.S. Patent No. 6,461,233

** Patent pending

+ Ring selected should be a minimum of 2" smaller than source container's inner bag diameter.

XPert® Bulk Powder Enclosures

SPECIFICATIONS

XPert Bulk Powder Enclosure 3963801 with Retaining Ring 3981300, Safety Sleeve 3981100 and Retaining Band 3981200.

Requires
Ductwork and
Blower

- Shipped in two sections.
- Three 2" x 10" rectangular exhaust openings on the top. Cover(s) provided for unused openings.
- Particulate containment independently verified by SafeBridge Consultants, Inc.
- Validation package available at www.labconco.com with powder containment and modified ASHRAE 110-1995 Test Reports; Installation Qualification/Operation Qualification (IQ/OQ) Protocol; and Maintenance Log.

All models conform to the following regulations and standards:

- SEFA 1-2002
- Modified ASHRAE 110-1995
- ANSI Z9.5-1993
- UL 3101-1/61010-1
- CAN/CSA C22.2 No. 1010.1
- CE Conformity Marking (230 volt models)

All models require:

- Remote Blower (sold separately). See page 44.
- Ductwork. See page 45 and inside back cover.
- Retaining Ring***. See page 43.
- Safety Sleeves**. See page 43.
- Retaining Bands**. See page 43.
- Access Opening Cover. See page 43.
- Waste Chute Bags. Contact your laboratory supply dealer.

Optional accessories for on-site installation include:

- Fluorescent Lights. See page 42.
- Additional Transfer Caddy. See page 43.
- Utility Shelves, Bottle Holder and Tissue Holder. See page 42.
- Duct Transition Adapters. See page 43.

* U.S. Patent No. 6,461,233 ** Patent pending
 † Ring selected should be a minimum of 2" smaller than source container's inner bag diameter.

All models feature:

- Ergonomic air foil with aerodynamic Clean-Sweep* airflow openings.
- Upper dilution air supply.
- Upper containment sash foil.
- Zone-perforated, pivoting rear baffle.*
- Side-entry air foils.
 - Guardian 1000 Digital Airflow Monitor that continuously monitors airflow and provides a digital readout of actual face velocity. An audible/visual alarm alerts the operator when airflow is outside set point range. RS232 communications port allows connection to user-supplied computer and may be configured for external input connections such as night setback or external alarm and up to three output relays. Includes epoxy-coated steel housing for mounting.
- Stainless steel work surface with front spill trough and right-side, center or left-side access opening for source container (drum).
- 2" square tubular steel base stand with leveling feet.
- Transfer caddy of glacier white, epoxy-coated 1" square tubular steel frame with 3" diameter caster that holds container up to 28" h x 19.5" dia. With caddy latch and positioning plate.**

- Push-button operated electric hydraulic lift mechanism for raising the container to the optimal ergonomic height (14" maximum travel distance).**
- Electronic beam to sense the location of the container and trigger the lift mechanism to automatically stop at the optimal access height.**
- Left side-mounted waste chute. Bags not included. Minimum bag size required: 10" x 16".
- Fourplex electrical receptacle located underneath the work surface.
- 1/4" thick tempered safety glass front sash, sides and top.
- Glacier white and gray, dry powder epoxy-coated aluminum frame and steel rear plenum and baffle. No unreliable plastic-to-plastic bonding is used.
- Ergonomic angled and hinged, pivoting sash with wiping seal, external gas-assist lift, 12.0" sash opening height, 25.75" locking height and 28.25" maximum loading height.
- Two utility ports for pass-through of electrical cords.

Nominal Width/Duct	Total Exhaust CFM and Initial Static Pressure (w.g.)					
	100 fpm	S.P.	80 fpm	S.P.	60 fpm	S.P.
5 Feet/10" dia.	480	0.54"	385	0.35"***	290	0.20"
6 Feet/10" dia.	580	0.75"	465	0.48"***	350	0.27"
8 Feet/10" dia.	775	0.42"	620	0.27"††	465	0.15"

*** Static pressure when one center exhaust opening is used.

†† Static pressure when two outer exhaust openings are used. Requires a "T" Connector 3981600, not included. See page 45.

FilterMate™ Portable Exhausters

SPECIFICATIONS

FilterMate Portable Exhauster #3970000. Includes HEPA filter.

FilterMate Portable Exhauster #3970001. Requires carbon filter (not included).

FilterMate Portable Exhauster #3970002. Includes HEPA filter and thimble connection. Requires ducting to outside.

FilterMate Portable Exhauster #3970003. Includes HEPA filter. Requires carbon filter (not included).

An accessory for the XPert® Balance Enclosure, the FilterMate uses a HEPA filter, carbon filter or a combination of both filters to remove hazardous powders, particulates or vapors from the exhaust air stream, returning filtered air to the environment.

All models feature:

- Compact, corrosion-resistant housing of glacier white and light gray, dry powder epoxy-coated steel with rubber feet.
- Variable-speed, non-sparking motorized impeller.
- ❑ Quiet operation. Oversized HEPA filter, efficient impeller and perforated exhaust cover work together to provide lower system exhaust velocity and noise pressure levels.

Exhaust CFM	Noise Pressure dB(A)
100	45-47
150	51-54
200	56-61
250	63-65

- ❑ Inherently safe design. A negative pressure plenum surrounds the positive pressure impeller so that if a leak occurs, the unfiltered air is captured and refiltered.
- ❑ Capable of up to 200 CFM for combination HEPA/carbon filtration (60-100 fpm depending on enclosure model).
- Front-mounted rocker switch to control power to the blower.
- ❑ Rear-mounted, auxiliary electrical outlet that may be connected to an airflow monitor or other user-supplied accessories.
- ❑ Only one FilterMate is required for 2', 3' and 4' wide enclosures. Contact Labconco for technical assistance regarding using multiple FilterMates for 5', 6' and 8' wide enclosures.

- ❑ Included: 8 feet of 5" ID flexible gray polypropylene hose, two clamps and a 4.88" OD Upper Transition Adapter for connection to the top of the XPert Balance Enclosure. Models 3970004 and 3970024 include a 4.88" OD Lower Transition Adapter instead of the Upper Transition Adapter.

- IEC 3-wire electrical cord with plug.

All models conform to the following regulations and standards:

- UL 3101-1/61010-1
- CAN/CSA C22.2 No. 1010.1
- CE Conformity Marking (230 volt models)

Models 3970000, 3970020, 3970002, 3970022, 3970003 and 3970023 feature:

- HEPA filter, 99.99% efficient on particulates 0.3 micron in size.
- ❑ True bag-in/bag-out filter disposal system for safely removing and replacing the filter without detaching the hose. The HEPA filter may be easily accessed by removing the exhaust cover for field leak testing by a certified technician.

Models 3970002 and 3970022 feature:

- 6.06" ID thimble connection from the FilterMate to an existing house exhaust system for added safety.

Models 3970001, 3970021, 3970003 and 3970023 require one each and Models 3970004 and 3970024 require two each (not included):

- Carbon Filter. Organic Vapor, Formaldehyde or Ammonia Filters are offered. See page 38.

Optional Accessories

- Replacement HEPA Filter. See page 38.
- Replacement Bag for Bag-In/Bag-Out HEPA Filter. See page 38.

❑ Exclusive feature

FilterMate™ Carbon and HEPA Filters

Organic Carbon Filter
3923400.

Replacement HEPA Filter
3707900.

Below is an Application Matrix that provides examples of appropriate uses for Filters expended in the FilterMate Portable Exhauster. Whether or not the FilterMate would be appropriate for your application requires consideration of factors such as the time-weighted exposure limits of your materials. Using Labconco's exclusive Chemical Assessment Program, our technical specialists can help you determine if the XPert Balance Enclosure with FilterMate Portable Exhauster is the right ventilation product for your application and, if so, estimate filter life. To begin the process, please complete the Chemical Usage Assessment Form available on our website at: www.labconco.com/chemical_usage.html or call us at 800-821-5525 or 816-333-8811.

Ordering Information

Catalog Number	Description	Shipping Weight lbs./kg
3923400	Organic Carbon Filter, Type AC. Contains 12 pounds of granular activated carbon media suitable for organic solvents including acetone, ethyl acetate, toluene and xylene.	13/6
3923401	Formaldehyde Carbon Filter, Type CI. Contains 14 pounds of impregnated carbon media suitable for vapors from formaldehyde.	17/8
3923402	Ammonia Carbon Filter, Type CX. Contains 16 pounds of impregnated carbon media suitable for ammonia and low molecular weight amines.	21/10
6924900	Syringe Kit for carbon saturation detection. Contaminant detector tubes sold separately.*	1/0.5
6926000	Formaldehyde Detector Tubes, package of 3.	1/0.5
6925700	Ammonia Detector Tubes, package of 3.	1/0.5
3707900	Replacement HEPA Filter, 99.99% efficient on particles 0.3 micron in size. Not suitable for use with biohazardous materials or volatile organic material.	10/5
3776002	Replacement Bag for Bag-In/Bag-Out HEPA Filter to contain particulate matter during filter changing.	1/0.5

* Contaminant detector tubes indicate the presence of a specific set of contaminants with a color change. Labconco offers Formaldehyde and Ammonia Detector Tubes. Detector tubes for organic vapors may be ordered from your laboratory supply distributor.

** Carbon filter type varies based on application.

† HEPA filter is placed above the carbon filter on the FilterMate so that particulate contaminants are removed first.

Protector® Standard Storage Cabinets

Protector Standard Storage Cabinet 9900000, 48" wide, with dual doors.

Protector Standard Storage Cabinets support XPert Enclosures and may be used for storage of supplies and small laboratory instruments.

Features:

- Support XPert Filtered Balance Systems, Filtered Balance Stations and Balance Enclosures.
- Durable epoxy-coated steel construction.
- Attractive glacier white exterior complements laboratory casework and XPert Enclosures.
- Manual-closing, non-locking door(s).
- Include four leveling feet and one 8" filler panel to increase cabinet depth from 22" to 30".
- **Work surface is required** (sold separately). See page 41.

Telescoping Base Stands

Telescoping Base Stand with Fixed Feet 3746702.

Inset: Telescoping Base Stand with Casters 3746710.

Telescoping Base Stands provide support for XPert Balance Enclosures.*

Features:

- Support XPert Filtered Balance Systems, Filtered Balance Stations and Balance Enclosures.
- Durable 1.75" tubular, epoxy-coated steel frame. Models 3' wide and larger have rear crossbar supports.
- Telescoping legs are adjustable to seven height positions in 1" increments from 27.5" to 33.5".**
- Available with four fixed leveling feet or 5" diameter, toe-locking, non-marking polyurethane casters with bearings for quiet operation.
- **Work surface is required** (sold separately). See page 41.

Contact Labconco at **800-821-5525** or **816-333-8811** for ordering information on other base stands.

SIDE

* Telescoping Base Stands do not isolate vibration. When using sensitive balances in the enclosure, a marble slab may be necessary to reduce vibration from outside influences.

** Height selection and adjustment are required before the enclosure is installed atop the stand.

XPert® Balance Enclosures and Bulk Powder Enclosures

ACCESSORIES

Solid Epoxy Work Surfaces

Black chemical-resistant work surfaces are dished to contain spills and contoured to fit the dimensions of XPert Balance Enclosures, Systems and Stations. Contact Labconco for ordering information on gray work surfaces. Available in 2', 3' and 4' widths.

Catalog #	Nominal Width	For use with:	Dimensions	Shipping Wt. lbs./kg
3909900	2'	XPert Systems, Stations	24.0" w x 29.0" d x 1.0" thick	50/23
3909901	3'	XPert Systems, Stations	36.0" w x 29.0" d x 1.0" thick	75/34
3909902	4'	XPert Systems, Stations	48.0" w x 29.0" d x 1.0" thick	100/45
3908400	2'	XPert Enclosures	24.0" w x 26.7" d x 1.0" thick	48/22
3908401	3'	XPert Enclosures	36.0" w x 26.7" d x 1.0" thick	72/33
3908402	4'	XPert Enclosures	48.0" w x 26.7" d x 1.0" thick	96/44

Stainless Steel Work Surfaces

Type 304 stainless steel work surfaces have a 1" deep front spill trough and fit dimensions of XPert Balance Enclosures, Systems and Stations. Available in 5', 6' and 8' widths.

Catalog #	Nominal Width	For use with:	Dimensions	Shipping Wt. lbs./kg
3975502	5'	29.0" deep XPert Systems, Stations	60.0" w x 29.0" d x 0.8" thick	150/68
3975503	5'	35.5" deep XPert Systems, Stations	60.0" w x 35.5" d x 0.8" thick	180/82
3975602	6'	29.0" deep XPert Systems, Stations	72.0" w x 29.0" d x 0.8" thick	180/82
3975603	6'	35.5" deep XPert Systems, Stations	72.0" w x 35.5" d x 0.8" thick	220/100
3975500	5'	29.0" deep XPert Enclosures	60.0" w x 26.7" d x 0.8" thick	140/64
3975501	5'	35.5" deep XPert Enclosures	60.0" w x 35.5" d x 0.8" thick	180/100
3975600	6'	29.0" deep XPert Enclosures	72.0" w x 26.7" d x 0.8" thick	170/77
3975601	6'	35.5" deep XPert Enclosures	72.0" w x 35.5" d x 0.8" thick	220/100
3975800	8'	29.0" deep XPert Enclosures	96.0" w x 26.7" d x 0.8" thick	240/109
3975801	8'	35.5" deep XPert Enclosures	96.0" w x 35.5" d x 0.8" thick	290/132

Trace Odor Carbon Filters for XPert Filtered Systems

For easy installation atop the XPert Filtered Systems. Filters trap non-volatile nuisance odors and vapors from samples or minute quantities of chemicals. Whether or not a Trace Odor Carbon Filter is appropriate for your application requires consideration of factors such as the time-weighted exposure limits of organic solvents, formaldehyde, ammonia or amines. Using Labconco's exclusive chemical assessment program, our technical specialists can help you determine if the XPert Filtered System with Trace Odor Carbon Filter is right for your applications and, if so, estimate filter life.

To begin the process, please complete the Chemical Usage Assessment Form available on our website at: www.labconco.com/chemical_usage.html or call us at 800-821-5525 or 816-333-8811.

Catalog #	Description	For use with:	Shipping Wt. lbs./kg
3937200	Organic, 5.5 lbs. activated carbon	2-Ft XPert System	6/3
3937300	Organic, 9.2 lbs. activated carbon	3-Ft & 6-Ft XPert Systems (2 required for 6-Ft Systems)	10/5
3937400	Organic, 12.9 lbs. activated carbon	4-Ft XPert System	13/6
3981400	Organic, 7.3 lbs. activated carbon	5-Ft XPert System (2 required)	8/4

3937302	Ammonia & Amines, 13.5 lbs. impregnated carbon	3-Ft & 6-Ft XPert Systems (2 required for 6-Ft Systems)	14/4
3937402	Ammonia & Amines, 18.9 lbs. impregnated carbon	4-Ft XPert System	19/9
3981402	Ammonia & Amines, 10.7 lbs. impregnated carbon	5-Ft XPert System (2 required)	11/5

XPert® Balance Enclosures and Bulk Powder Enclosures

ACCESSORIES

XPert Filtered System and Station Replacement HEPA Filters and Accessories*

Catalog #	Description	For use with:	Shipping Weight
3707900	Replacement HEPA Filter, 99.99% efficient on particles 0.3 micron in size, 18.0" w x 18.0" d x 3.3" high	2-Ft XPert System, Station	8 lbs. (4 kg)
3707901	Replacement HEPA Filter, 99.99% efficient on particles 0.3 micron in size, 30.0" x 18.0" x 3.3" high	3-Ft XPert System, Station 6-Ft XPert System, Station (2 req.)	15 lbs. (7 kg)
3707902	Replacement HEPA Filter, 99.99% efficient on particles 0.3 micron in size, 42.0" w x 18.0" d x 3.3" high	4-Ft XPert System, Station	20 lbs. (9 kg)
3707903	Replacement HEPA Filter, 99.99% efficient on particles 0.3 micron in size 24.0" w x 18.0" d x 3.3" high	5-Ft XPert System, Station (2 required)	13 lbs. (6 kg)
3776003	Replacement Bag for Bag-in/Bag-out, HEPA Filter, 48" circumference x 54" long	2-Ft XPert System, Station	5 lbs. (2 kg)
3776004	Replacement Bag for Bag-in/Bag-out, HEPA Filter, 73" circumference x 96" long	3-Ft XPert System, Station 6-Ft XPert System, Station (2 req.)	7 lbs. (3 kg)
3776005	Replacement Bag for Bag-in/Bag-out, HEPA Filter, 96" circumference x 96" long	4-Ft XPert System, Station	9 lbs. (4 kg)
3776006	Replacement Bag for Bag-in/Bag-out, HEPA Filter, 60" circumference x 72" long	5-Ft XPert System, Station (2 required)	6 lbs. (3 kg)

* HEPA filter removal and replacement should only be performed by a certified technician.

Fluorescent Lights for XPert Enclosures

Rest atop XPert Enclosures for enhanced illumination of the interior. Include auxiliary electrical receptacle with switch for connection of accessories such as a printer or airflow monitor. More than one may be used on larger enclosures. 18.3" w x 10.1" d x 3.0" high.

Catalog #	Description	Shipping Wt. lbs./kg
3909200	115 volts, 60 Hz, 10 amps. Includes IEC, three-wire cord with plug.	15/7
3909201*	230 volts, 50 Hz, 10 amps. Includes IEC, three-wire cord. Plug is required (not included).	15/7

3925000 Utility Shelves

For use with any XPert Enclosure, Station or System. Three epoxy-coated steel shelves attach to the rear baffle perforations to hold a

printer, utensils and other miscellaneous weighing supplies. The utensil shelf has a scalloped front edge to support spatulas, brushes and other items. Shipping weight 5 lbs. (2 kg)

3927700 Bottle Holder

For use with any XPert Enclosure, Station or System. Epoxy-coated steel. Attaches to the rear baffle perforations to hold a squirt bottle or other round container. 3" diameter opening. Shipping weight 1 lb. (0.5 kg)

3927800 Tissue Holder

For use with XPert Enclosure, System or Station. Epoxy-coated steel. Attaches to the rear baffle perforations to hold tissue wipers in the upside down position.

An opening in the holder permits wipers to be dispensed from the bottom. Shipping weight 1 lb. (0.5 kg)

3744000 Ergonomic Chair with Armrests

Chair has 6-way articulating seat and back control for personalized adjustment. Pneumatic mechanism adjusts seat height from 18.25" to 25.75". Five-leg black reinforced composite base rests on 2" ball-bearing casters. Aluminum support ring. Removable arm rests. Black vinyl upholstery. Shipping weight 35 lbs. (16 kg)

3746000 Adjustable Footrest

Elevates feet and permits angle repositioning while in use. 18.5" w x 11.5" d x 8" high. Shipping weight 6 lbs. (3 kg)

XPert® Balance Enclosures and Bulk Powder Enclosures

ACCESSORIES

Safety Sleeves*

For use with XPert Bulk Powder Filtered Systems, Stations and Enclosures. Provide an extra barrier between the source container and work surface. Polyethylene. One size fits all source containers. Dimensions: 36.0" diameter x 18.0" long x .0015" thick.

Catalog #	Description	Shipping Wt. lbs./kg
3981100	Package of 100	3/1
3981101	Package of 500	15/7

3981200 Retaining Bands*

For use with XPert Bulk Powder Filtered Systems, Stations and Enclosures. Secure the Safety Sleeve and inner source container bag to the Retaining Ring. Bands fit all sizes of Retaining Rings. May be discarded after use or cleaned and reused. Package of 5. Shipping Weight 1 lb. (0.5 kg)

3961300 Transfer Caddy*

One is included with every XPert Bulk Powder Enclosure, Filtered System and Station. An additional caddy may expedite source container retrieval. Durable glacier white, epoxy-coated 1" square steel frame with 3" diameter casters. With caddy latch and positioning plate. Shipping weight 35 lbs. (16 kg)

Retaining Rings*

For use with XPert Bulk Powder Filtered Systems, Stations and Enclosures. Mount to the work surface to secure the inner source container bag and/or Safety Sleeve. Type 304 stainless steel.

Select a Retaining Ring that is slightly larger than the diameter of the source container to facilitate container lid removal and a minimum of 2" smaller than the source container's inner bag diameter. Include six fasteners. 23.8" OD.

Catalog #	Ring Diameter	Shipping Wt. lbs./kg
3981300	19.62" ID	4.5/2
3981301	17.50" ID	5.0/2
3981302	14.50" ID	5.5/3
3981303	11.50" ID	6.0/3

3981304 Access Opening Cover*

For use with XPert Bulk Powder Filtered Systems, Stations and Enclosures. Covers the opening and provides a flat surface. Type 304 stainless steel. Includes six fasteners.

23.8" OD. Shipping weight 10 lbs. (5 kg)

*Patent pending

Duct Transition Adapters for XPert Enclosures

Catalog #	Description	Shipping Wt. lbs./kg
3912400	Upper Exhaust Transition Adapter, epoxy-coated steel, 2" x 10" rectangular to 5" diameter round for connection to 5" ID hose (included with FilterMate Portable Exhauster)	5/2
3912401	Upper Exhaust Transition Adapter, epoxy-coated steel, 2" x 10" rectangular to 6" diameter round for connection to 6" OD duct	5/2
3912402	Lower Exhaust Transition Adapter, epoxy-coated steel, 2" x 10" rectangular to 5" diameter round for connection to 5" ID hose	5/2
3912403	Lower Exhaust Transition Adapter, epoxy-coated steel, 2" x 10" rectangular to 6" diameter round for connection to 6" OD duct	5/2

Canopy Connections for XPert Filtered Systems

Allow the XPert Filtered Systems to be thimble-ducted to the outside for additional protection. The canopy's air gap provides a means of balancing air by allowing room air to enter the ductwork and mix with the filtered air being exhausted from the XPert System. **House exhaust or remote blower is required (not included).**

Catalog #	Description	For use with:	Shipping Weight
3924400	Canopy Connection, 6.06" ID, 6.19" OD	2-Ft XPert System	15 lbs. (7 kg)
3924401	Canopy Connection, 6.06" ID, 6.19" OD	3-Ft XPert System	18 lbs. (8 kg)
3924402	Canopy Connection, 6.06" ID, 6.29" OD	4-Ft XPert System	21 lbs. (10 kg)
3924403	Canopy Connection, 10.06" ID, 10.29" OD	5-Ft XPert System	25 lbs. (11 kg)
3924404	Canopy Connection, 10.06" ID, 10.29" OD	6-Ft XPert System	30 lbs. (14 kg)
3924405	Canopy Connection, 5" ID*	2-Ft XPert System	15 lbs. (7 kg)
3924406	Canopy Connection, 5" ID*	3-Ft XPert System	18 lbs. (8 kg)
3924407	Canopy Connection, 5" ID*	4-Ft XPert System	21 lbs. (10 kg)

* For use with FilterMate Portable Exhausters

XPert® Balance Enclosures and Bulk Powder Enclosures

REMOTE BLOWERS FOR DUCTED SYSTEMS, STATIONS AND ENCLOSURES

Remote Blowers

Required when ducting the XPert Filtered Station or XPert Enclosure (unless connected to house exhaust or the FilterMate Portable Exhauster) and recommended when thimble ducting the XPert Filtered System. TEFC-type direct drive motor blower. Corrosion-resistant phenolic-coated steel housing and impeller. Blower inlet is sized to accept 6" nominal diameter PVC duct. Blower outlet is 4.3" x 7.4" OD. Dimensions: 14.6" w x 13.5" d x 13.3" high.

Catalog #	HP	Electrical Requirements	Shipping Wt. lbs./kg
4863500	1/4	115 volts, 60 Hz, 4.4 amps	35/16
